dormakaba⊿

This Kit Contains:
10 User Fobs with 10 Deletion Cards

FUNCTION CARD
Enrolment card

1. At installation, present this card to the reader to validate the tokens in this pack

2. To re-validate a user token present this enrolment card to the reader followed by the user token
▼Paxton

1 Enrollment Card

IMPORTANT: Identify user name on matching Deletion Card before removing them from the wallet. **Do not mix pairs of fobs/cards before writing on Deletion Card.** This is a starter pack only. Additional fob packs (purchased separately) may be added to your system. Please contact dormakaba for more information.

3 Special Function Cards:

FUNCTION CARD
Door open time

The period that the door is unlocked for when a valid token is presented is set as follows:

1. Present this card
2. Wait for the required period
3. Present this card again, the beeping will stop

▼Paxton

1 Door Open Time Card

FUNCTION CARD
Fail open release

This card is used with systems where a fail open electric release is used for the safe operation in the event of a fire. Present the card to the reader to drive a fail open release or a maglock. Present the card again to revert to the fail closed operation.
