

Crane revolving doors

Renaissance

A Crane® Renaissance revitalization kit makes your old revolving door better than new by updating its function, style, and safety.

Like any other type of door, a revolving door requires annual maintenance. But what if the door has not been properly maintained or its style appears outdated? The Renaissance revitalization kit from Crane is the ideal solution.

Crane can manufacture a revitalization kit to any dimension to replace the wings and hardware of an existing revolving door, no matter who the original manufacturer is. (The enclosure and canopy do need to be level and plumb to ensure proper fit and operation.)

Renaissance revitalization kits for automatic and security doors are also available.

Renaissance kit

A Crane® Renaissance revitalization kit can be manufactured from aluminum, stainless steel, bronze, or wood, either to match the original door as closely as possible or to give new style to an outdated entrance.

Safety may also be a consideration. Some older revolving doors do not have the hardware needed to bookfold for emergency egress, or the bookfold mechanism may no longer function properly. Installing a Renaissance revitalization kit eliminates that safety issue, ensuring the door is safe in an emergency situation.

The revitalization kit includes everything needed to properly mount and fit into the existing enclosure and canopy. A kit may include:

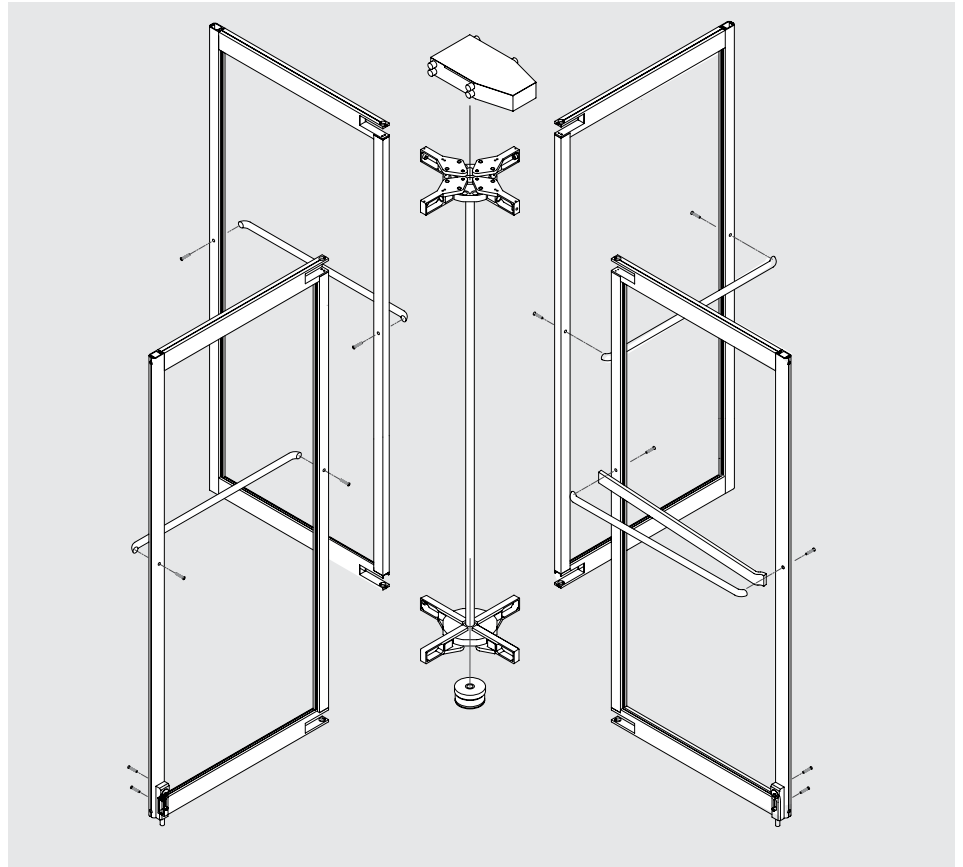

- Speed control*
- Center shaft with cover
- Bookfold mechanism
- Hanger discs
- Hangers
- Pivot bearing
- Pre-glazed wings with weathersweeps
- Push bars
- Bumpers
- Lock cases

* Overhead or Floor Mounted Speed Control available, depending on application and existing conditions.
