

# Kaba exos 9300

## LoxTop Key depot

### Advantages at a glance

#### Secure administration of mechanical keys

- Secure key storage and key hand-off
- Clear assignment of rights – access only for authorised users
- Alarm if key is not returned

#### Integrated in exos

- Central user/rights administration
- Logbooks

#### Stand-alone function

- Up to 520 keys or 200 lockers per depot
- User/rights administration directly on the device

#### Electronically secured mechanical keys

LoxTop key depots allow you to store your mechanical keys optimally and securely. Thanks to the electronic user administration and assignment of rights in Kaba exos 9300, only authorised users have access to their respective keys. Additionally, the system keeps detailed records of who picked up and returned which key at what time.

#### Modular upgradability

The depots can be expanded in a modular manner. Up to 520 keys or 200 lockers can be combined in one depot group.

Several key depots can be combined in one exos system.

#### Combination of lockers and keys

The depots can be configured individually and used either as pure key administration depots or as depots with integrated lockers.

It is also possible to install USB charging sockets to charge mobile phones while they are stored.

## Features

### Central rights administration

- Role-based user administration
- Key removal with time limitation
- Maximum permissible number of simultaneous key removals per user

### Individual authentication thanks to configurable options

- RFID card
- PIN code

### Device design

- Modular system
- Standard colors: white or anthracite; other colors on request

## Examples of use

### Administration of building keys

Safely stored in a key depot, building and office keys may be removed by housekeepers or security personnel for service purposes as needed.

### Administration of car keys

Key depots are frequently used by car rental companies or company-owned vehicle pools for fleet management. In this way, authorised persons have easy access to the car key of the reserved vehicle.

### Administration of mobile phones

Before entering areas where the use of a mobile phone is not permitted, employees can securely store their phones in a depot. It is also possible to charge the mobile phone while it is stored.

## Functional Principle

## Technical data

### Depot

- Industrial embedded computer with touch-screen
- Low power consumption
- Integrated backup battery
- Software in different languages
- LED display for key/locker
- Wall mounted or cabinet on stand

### Network/connections

- LAN connection
- Synchronisation between depots
- Web-based remote access
- Automatic software updates (internet)
- API-Connection

### Alarm handling

- Break-open alarm
- Alarm signal to external systems
- Alarm signal from external systems

### Dimensions

- Depending on version

### Weight

- Depending on version
