Smart and modern
Access for your
Home

dormakaba

Welcome home – walk right in
Whether for your children, your neighours or your partner: the evolo smart app allows you to organise all access rights quickly and easily. It helps you to organise your busy life, because with the evolo smart app you keep your options open. Issue new access media such as a card or a key fob, and delete them whenever you want.

You can enter with your smartphone
In addition to the key fobs and cards, you also can use your smartphone as an access medium. To authorise it, just get a virtual key via the evolo smart app. Send it electronically to the smartphone on which you have downloaded the free DOOR by dormakaba app. Then, just walk right in.

evolo smart makes your door smart
Do you want to grant certain people access to your home - but not all the time? No problem. With the evolo smart app, you define who can open your door and when. For example, the nanny or the cleaning specialist only can enter at certain days and times. Good to know, you can track door events, so you see who entered and left your house and when.

Peace of mind within your own four walls at all times
Lost your key? When you lose your key, you lose the feeling of security. With evolo smart, you regain it with a swipe. Regardless of whether the key was lost or your circumstances have changed – you don't need to replace all the locks. Simply delete the access medium in the evolo smart app. Then you update your door and everything is under control.

compact reader

How it works

With the free evolo smart app, you define who has access to your home.

If you would like to give time-limited access to certain individuals, just define the time profile simply by tapping on the app. Use the app to issue and delete access media and update your door components. The status information of the door is shown directly on your smartphone.

And the best part: You don't need an internet connection to do all this, evolo smart runs offline.

dormakaba evolo smart
Access with Smartphone, Program with an App

Would you like to equip your door with modern access control and manage your access rights via app? Your loved ones can choose whether they want to enter with a card, chip or smartphone.

With the evolo smart app, you define who has access to your home and when. All you need is your smartphone.

Your benefits at a glance
- Fast and convenient - easy programming via smartphone
- Great selection - access with card, key chip or smartphone
- Flexibility - Delete and add access media for up to 50 users
- Secure - Access limited in time
- Overview - you can see who entered and exited when

Trust is good, knowing is better: now you define who can open your doors and when.
