

Residential Visitor Management

Flexibility for residents

Today's residents live busy lifestyles with increased demands on their time. They need an easy way to manage the increased frequency of deliveries and visits from service providers or family and friends. Providing easy access to these temporary visitors or recurring guests is possible with Community™ Residential Visitor Management which puts access control in the hands of the resident.

Using dormakaba's BlueSky app property managers and residents can now control access points including exterior and common areas with enhanced security through the creation of mobile keys and PIN codes. Mobile keys are also available on unit doors.

Residents can provide temporary or recurring visitors access by sending PIN codes verbally, by text or e-mail with minimal disruption to their busy lives.

Applications

- Takeout food delivery
- Deliveries for online shopping
- Cleaners
- Dog walkers
- Family and friends
- Maintenance visits

Less hassle, more options for property manager

The Community access management software solution is specifically designed for multihousing operations and meets the expectations of today's residents for simplified access management.

Community enables property managers to manage access throughout the entire property providing security and operational efficiency. Our new PIN code and mobile key Visitor Management capability gives residents the flexibility they demand, and property managers the control they need.

Features

- Generate and manage PIN and mobile access credentials through the enhanced BlueSky App
- Advanced PIN management - from single use PINs for one-off visitors, to multi use PINs for longer term or reoccurring visitors
- Now supports long distance reader designed for parking and service areas, and improved disabled touchless access

PIN Management

Residents can create and manage PIN access to their property, including single use, date and time specific use, multiple use or time restricted access. Community now supports our easy-to-use XpressPIN for single use.

Ideal for: Takeout food deliveries, online shopping deliveries, facilities and maintenance

Mobile Access Management via BlueSky app

For frequent or recurring guests, mobile access gives property management and residents a higher level of security and control, combined with the convenience of using their own mobile device.

Ideal for: Dog walkers, cleaners, family and friends

Long Range Distance Readers

Many properties require the ability to activate secure perimeter devices from a distance to optimize high flow traffic areas. Community Visitor Management supports identification, verification and activation for any automated access point.

Ideal for: Car parking, limited mobility access, high volume entry points, and touch-less access initiatives

BlueSky

The dormakaba BlueSky app now includes full visitor management. The intuitive look and feel provides a wide range of new features that allows residents to manage access to their facility.

Ideal for: Residents, self-guided tours

Supported Hardware

Reliable, integrated wall reader with intuitive design that supports several unique credentials.

- RFID Proximity
- PIN
- Mobile access

New and Existing Projects

Community Visitor Management is quick and easy - Install the Community Software and get access to complete Residential Visitor Management.

Customers who already have our mobile access solutions will automatically benefit from the additional BlueSky app features and upgrade their system to support resident visitor access.
