KTV ATRIUM FLEX

All-glass revolving door - ideal for modern façades

KT FLEX Direct the new electromagnetic direct drive system minimises tolerances and wear. Its gearless power transmission is based on magnetic technology - tested to 2 million cycles.

The LED ring in the all-glass revolving doors elegantly highlights the drive and simultaneously provides constant flicker-free illumination of the interior.

Dimensions

| | |
|-----------------------------|---|
| Inside diameter | 2,000 – 3,000 mm |
| Outside diameter | inside diameter + 98 mm (coated), +102 mm (stainless steel surfaces) |
| Clear passage height | 2,100 – 4,000 mm |
| Total height | clear passage height + 84 mm (coated), + 86 mm (stainless steel surfaces) |

Advantages at a glance

The KTV ATRIUM FLEX all-glass revolving door offers modern drive technology in an extremely elegant, transparent design.

Areas of application:

External facades as entrance, especially to highly frequented buildings. For safe and comfortable people flow, minimising energy consumption and noise protection. An obvious choice to protect the building interior from draughts, noise and dirt.

Features:

- Internal diameters from 2,000 mm to 3,000 mm.
- Impressive passage heights of up to 4,000 mm
- 3- or 4-wing turnstile designs
- Side walls with special laminated safety glass filling
- Operator installed under the ceiling, no underfloor drive required
- LED ring enhances ambience and gives flicker-free illumination.
- Different drive types with only one drive system: from manual to power-assisted to fully automatic
- Tested and certified for 2 million cycles durability
- Tested for up to 1.2KPa of wind load

Contribution to sustainability:

- Manufactured from durable materials using resource-efficient design.
- With environmental product declaration (EPD certificate) and Health Product Declaration (HPD)

Due to the effective separation of interior and exterior areas, revolving doors also contribute to energy savings.
