

Fusion[®]

Interior glass systems

Glass walls with wood door

dormakaba Interior Glass Wall Systems bring the benefits of glass to the workplace—transparency, daylighting, versatility, efficiency, space saving, and low cost of ownership. These glass wall systems come in a range of sleek but resilient minimalist designs and configurations, allowing you to select a system that matches your project's functional and aesthetic requirements.

Design

The FUSION[®] Glass Wall design realizes an innovative mixed media concept: cool transparent glass walls merged with warm wood doors. Intriguing design possibilities open up immediately for both modern and traditional décors. Despite the sophisticated combination of elements, the design remains clean and simple—no door control hardware is visible on the door.

The FUSION concept works with these dormakaba Interior systems: DORMA PURE[®] or PURE ENCLOSE[®] Pivoting systems and Traditional or SoftClose Sliding systems. The MAGNEO[®] Magnetic Drive Sliding Entrance System may also be used to control the wood door.

Applications

Because a FUSION Glass Wall consists of a wood door paired with either a DORMA PURE or PURE ENCLOSE system, refer to those descriptions for basic recommended applications. Specific to the FUSION design, a wood door can serve as a focal point—drawing attention to an entryway, conference room, or CEO executive suites.
