

**PRODUCT:** Cencon<sup>®</sup>  
**SUBJECT:** Cencon<sup>®</sup> 9-Digit Serial Number  
**BULLETIN:** #039  
**DATE:** 9/28/12

**Effective October 1st, 2012, current production Cencon locks will ship with 9-digit serial numbers.**

Cencon users that are operating with down level software must be upgraded to at least Cencon 4.0 Software to utilize the new 9-digit serial number format.

**The Next Million**

Production of the one millionth Cencon lock represents a significant milestone that brings with it additional opportunities for new and existing Cencon users. The hardware platform of the Cencon Gen2 lock is the foundation for a wide array of features and advanced functions available now, as well as options in development that will keep Cencon positioned well ahead of any other product in the market.

Kaba Mas is committed to staying ahead of potential security threats by employing modern encryption technologies. Additional hardware, firmware and software enhancements will make Cencon stronger and more flexible than ever, presenting operational efficiencies for your organization only possible with the Next Million!
