E-Plex M-UNIT

User-friendly portable programming and auditing device

The E-Plex Offline M-Unit is a handheld diagnostic and configuration file transfer tool. It is designed to be used with E-Plex locks that conform to the most recent versions of both the Aurora and LUNA software clients. The M-Unit can help set up offline E-Plex locks by gathering data from the Aurora/LUNA client and transferring it the lock. This device can also transfer audit trails and be used as a site survey tool.

User Benefits

- **Plug and Play** - Does not require additional software or drivers and works just like a USB key

- **Durable** - Extremely robust and designed to withstand regular wear and tear

- **Firmware update -** Ability to update firmware for both online and offline locks from M-Unit

- **Site survey -** Use M-Unit to conduct a wireless site survey, prior to installation, to ensure best possible gateways positioning

- **Fully Compatible** - Uses the USB mass storage standard supported by Windows® and Apple® operating systems. No driver is required

- **No synchronization or software required** - Simply drag and drop the file into the appropriate drive to get started.

- **Simple to use** - Locks are programmed through infrared communication between the M-Unit and E-Plex locks.

- **Warranty** - Two Years

Your M-UNIT Kit will include
