

Keyscan Aurora Software

What's new in Version 1.0.24

AURORA CLIENT

- Added the missing types in System Log Report so that the report can be filtered, and type shown in System Log Entries.
- Added the ability to set auto purge of the transactions older than 2 years when scheduling database backup. This option is only available if Aurora is using Full SQL Server.
- Added the ability to set auto purge of the system logs older than 2 years when scheduling database backup. This option is only available if Aurora is using Full SQL Server.
- Added the ability to set auto purge of the visits older than 2 years when scheduling database backup. This option is only available if Aurora is using Full SQL Server.
- Added option to include Person ID and Person Custom Unique Identifier fields to Output Module for integration purposes and necessary output module changes to support this feature.
- Added system and user level options to create new users without requiring a password reset upon first login
- Changed the checking if Agent is running process.
- Changed font size when showing Keyscan Mobile credentials activation code.
- Changed „Enterprise“ to „Elite Edition“ in all Aurora products.
- Changed E-Plex door status widget to behave like a Keyscan door and be shown as locked while in lockdown if previously unlocked.
- Changed Join Mode for E-Plex Gateways to allow only one gateway to be in join mode at a time.
- Changed Kaba 17-byte credential to have a random value instead of a blank value when creating new
- Changed check of all groups selected in Group Access Report when the group filter is applied.
- Corrected clearing of Custom Person ID field (if applicable) in Person Search Screen when Clear button is clicked on.
- Corrected a problem that prevented non-master users from saving changes to card templates.
- Corrected holiday setup link to Help section.
- Corrected schedule assignment link to Help section.
- Corrected copy credential configuration to other sites when user cannot see all sites that the credential is assigned too.
- Corrected issue in E-Plex Low Battery report that was happening if some of the E-Plex doors do not have battery readings, and some do.
- Corrected issue in E-Plex Battery Level Report when all E-Plex doors on all sites are shown in the report if all E-Plex doors in the site are selected for the report.

Keyscan Aurora Software

- Corrected issue when the health warning is not shown when logging in.
- Corrected a problem exporting large BEST systems that take more than 60 seconds to retrieve.
- Corrected PIN validation error message to display max PIN value when Aurora is in KABA integrated mode and user tries to set the PIN to zero
- Corrected issue in Cumulative Hours report when people selected for the report are cleared when People tab is re-selected.
- Corrected issue in People In/Out report when people selected for the report are cleared when People Filters tab is re-selected.
- Removed milliseconds from transactions.
- Removed Device ID, Person ID and Credential ID from Transaction Report csv export.
- Removed 2000-person limit in Cumulative Hours Report.

AURORA WEB CLIENT

- Updated Aurora Web's default person image.
- Updated Aurora Web's transaction report logo.
- Updated Aurora Web's enterprise edition logo to the elite edition and modified styles to ensure logos are sized and placed properly.
- Corrected a problem that prevented users from saving credentials with 7-digit PINs

AURORA COMMUNICATIONS

- Added to the Output module, will now output software generated transactions (Communications Pre-Alert, Communications Failure & Communications Restored)
- Corrected floor timed unlock package from being recreated.
- Corrected issue where we did not catch error when trying to send a message to a TKE server that isn't there.

AURORA E-PLEX COMMUNICATIONS

- Corrected E-Plex lockdown to lockdown an individual lock instead of all locks connected to the gateway via software.
- Corrected E-Plex lockdown not locking down when initialized by the lock on a legacy gateway.
- Updated to latest Log4net version.

Keyscan Aurora Software

AURORA VIRTUAL COMMUNICATIONS

- Changed Non Keyscan TKE kiosks will be sent open access configuration to all floors.

AURORA SDK

- Added the TransactionType property to the AuroraTransaction class.
- Modified the AuroraSDK.Enums

AURORA DISASTER RECOVERY

- Corrected issue when doing a disaster recovery and database cannot be backed up because of the wrong message that the agent is not running.
