

# Kaba star – colour concept

## Simple organisation and assuefaction

### Key organisation

Stay on top of things: With our clip attachments, available in 14 colours, you can easily organise the master key system by assigning colours to individual zones and floors. Take one look at the key ring and you can see which key goes with which zone, building, floor or individual door.

### Colour coding system

This colour coding system is only available for Kaba star and offers a special added value by enabling you to also apply the organisational colour element to the locking cylinder. The ring elements are available in seven different colours and offer a colour differentiation of, for example, emergency exit and zone doors. The glow-in-the-dark ring element also supports assuefaction, opening and closing in low-light conditions.

### Your advantages at a glance

- 14 colours for visual marking and easier assuefaction
- Easier operation in low-light conditions with glow-in-the-dark clip attachments on the key
- Colour coding system with 7 colours directly on the cylinder
- Elegant, award-winning key design
- Fulfils the highest security requirements, patent protection until 2033
- Kaba star cross – active protection against copying through modern 3D print methods

	White	157

## One key for everything

The Kaba star system enables every user to cover their authorisations within the key plan hierarchy with a single key – in both the private or commercial sphere. This establishes clear relationships, ensures you have a lighter key ring and it means that searching for the right key becomes a thing of the past.

## Applications

- Domestic properties, including multi-family dwellings
- Small shops
- Commercial operations
- Industrial and administrative buildings
- Public facilities such as schools and local authority offices
- Hotels, care homes, hospitals

Various technical features of our keys are protected by patent law.
