

The Grange

Digital smart entry pull handle

Outstanding design

Digital Smart entry pull handle

New tenants

A seamless handover

The Grange digital entry pull handle will change the way you think about security. Allowing you to unlock your door with a PIN, fob or smart phone via Bluetooth.

Perfect for both residential and some commercial applications. The Grange offers both security and convenience with keyless entry.

It is manufactured using the finest materials to combine the highest standards in quality, functionality and design.

Remote access code sharing providing time sensitive remote access

In Bluetooth mode, the dormakaba Smart lock app allows the administrator to generate a pin code for a visitor/short term stay guest according to specific time periods. These can then be shared via multiple methods of media, such as email or text messages.

Simple access, your way

With the comfort of having everything on a single device, The Grange covers all the possible options to allow access to your residence.

Starting with an elegant and sophisticated stainless steel pull handle available in two different finishes (stainless steel and black matt) to enhance the look of your house entrance.

The Grange also provides a high level of mechanical security using an anti-pick and anti-bump override key cylinder that distinguishes it from the other electronic keyed devices in the market. Each Grange handle is pinned to a unique key code.

If you decide to go keyless, The Grange is complemented with different technology access options to increase the possibilities and to make your life easier. You can choose among digital codes, fob/cards or simply using the benefits of The Grange mobile app available for both android and iOS devices.

Advantages at a glance:

- Integrated keyless entry
- Operated by pin, fob or mobile phone
- Bluetooth
- Back to back pull handle
- Secured with a heavy-duty deadbolt
- Anti-pick and anti-bumping key cylinder
