

XPressEntry

Handheld reader & emergency
musterung integration

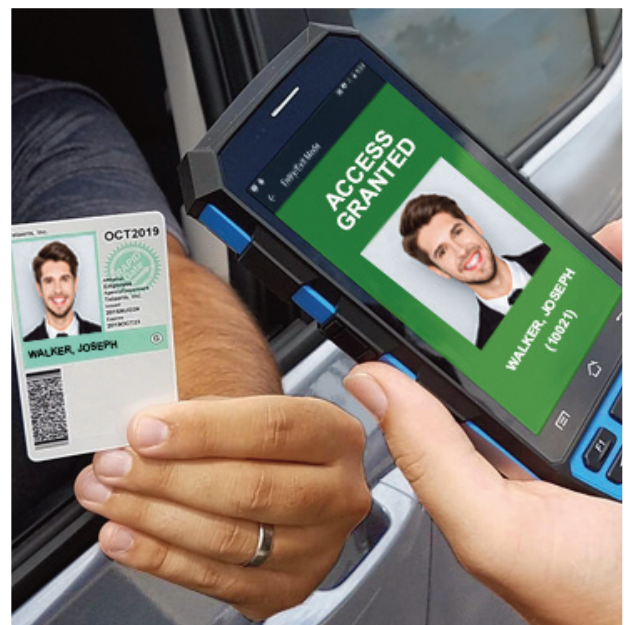

Emergency mustering solution made easy with Aurora - XPressEntry software integration

XPressEntry is an industry leading, emergency evacuation and employee mustering solution utilizing handheld badge readers. It now integrates with Keyscan Aurora.

Together, the readers and software keep track of facility occupancy by monitoring existing access control software to verify that personnel and visitors are evacuated and safely accounted for during emergency situations.

XPressEntry enhances your Keyscan Access Control System with handheld readers and emergency mustering. Compatible handheld devices, powered by XPressEntry software, authenticate user credentials or biometric data with your Keyscan Aurora database and allow validation of personnel names and photos.

XPRESSENTRY

Features and benefits:

Roll call from remote locations	Identify and verify who is safely accounted for at evacuation sites and mustering points, both on-site or at remote locations.
Live Personnel Tracking	Provides mobile roster lists which maintains the last scanned location and status of all personnel, with updates communicated seamlessly between all handheld devices.
Offline activity recording	Will continue to record activity and update occupancy statuses offline when connectivity is lost.
Notify first responders	Provides first responders with names, ID photos, and last recorded location of personnel and visitors who are not accounted for.
Safety and emergency readiness	Adds robust technology to existing emergency action plans and elevates emergency readiness.
Multiple badge reading capability	Telaeris handheld readers can read more badge types and technologies than any other handheld reader in the industry.

Integration Requirements:

Software	Keyscan Aurora Ver. 1.0.16 or higher Telaeris XPressEntry software* <small>* Visit www.telaeris.com/xpressentry/emergency-mustering/ for added information on software and installation.</small>
