

**MATRIX ONE is installed on a PC or server on the premises; it is browser-based.**

As soon as it is installed, MATRIX ONE can be accessed by any authorised computer in your network. All you need to do is enter the access media to immediately benefit from the secure, simple and browser-based access solution

**Features and Benefits**

**Fast and easy setup**

MATRIX ONE covers the key requirements for small and medium-size enterprises, so it can be used directly without any major adaptations and adjustments. Once the hardware is connected, configuring and set up can be completed with ease; saving cost, time and personnel.

**Controlled reliable management from anywhere**

MATRIX ONE is controlled via a modern, intuitive and multilingual browser interface. Once installed on your server, the browser-based system can be accessed by every computer in your network. All of this facilitates operation, installation and maintenance.

**Security**

MATRIX ONE is installed on a PC or server for you to manage, so you always keep full control over your access solution. The system also complies with the latest standards in access control.
