

Cylinder Corrosion Testing

EN1670 Grade 5 (480 Hours)

**CORROSION
RESISTANT**

Application:

dormakaba High Security cylinders are suitable for outdoor use, in exceptionally severe conditions where long-term protection of the product is required.

The adjacent dormakaba high-security cylinder range has been independently tested in accordance with the Building Hardware - Corrosion Resistance Standard - BS EN1670, achieving grade 5, the highest grade possible.

As part of this test, our cylinders have been proven to withstand 480 hours of salt spray testing and are considered to have exceptionally high corrosion resistance. On completion of the 480-hour duration, cylinders are still required to function in accordance with their existing EN1303 accreditation.

dormakaba are proud to say that our cylinders are suitable for outdoor use, in exceptionally severe conditions where long-term protection of the product is required.

Cylinder Families:

- Kaba 20
- quattro Plus
- expert
- pextra+ Guard
