

dormakaba **Terminal 97 00**

Time and attendance
recording and
employee
communication
at its best

Terminal 97 00 can be easily integrated into your company – and you'll soon realise that you can't do without it.

We've perfected form and function – for you

Stylish, versatile, practicable – this sums up the customisable high tech terminal 97 00 with proximity sensor. This versatile modular solution combines efficient time and attendance recording with modern employee communication. Everything inside. Everything customised to your company. Everything simply easy.

The user interface can be configured as you like – with your corporate design, for instance. Multimedia content like training films, business apps and employee infos can be easily integrated, and also your own acoustic command signals. Efficient add-on options like biometric card readers or camera systems leave no wish unfulfilled.

Terminal 97 00 sets standards in function and design. It also perfectly adapts to your company's requirements. Experience time and attendance data recording and employee communication at its best. Opt for Terminal 97 00.

the company's own
image film

Maximum freedom of design – you choose the look and acoustics you want

Terminal 97 00 not only offers elegant looks. The user interface is also a hit with its attractive modern design. Would you rather choose the look and acoustics yourself? No problem at all. You can customise the user interface to suit yourself in a few easy steps for a look as original as your company.

Preset display layouts and standard signal sounds are out: instead you decide how your terminal looks and sounds with your own colours, background images, logo, icons, apps, acoustic signals or multimedia content.

Ready to go at the turn of hand – thanks to easy assembly and set-up

Just do it

- Network integration via Ethernet interface
- Voltage supply optionally with Power-over-Ethernet (PoE), 24 V DC or 230 V AC
- Supports current RFID media
- Compatible with predecessor versions

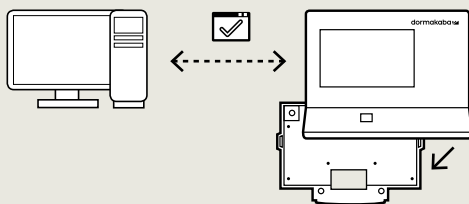

Fast reliable set-up with "1-click installation"

The docking station supplied enables fast, easy and reliable installation. It's as simple as this:

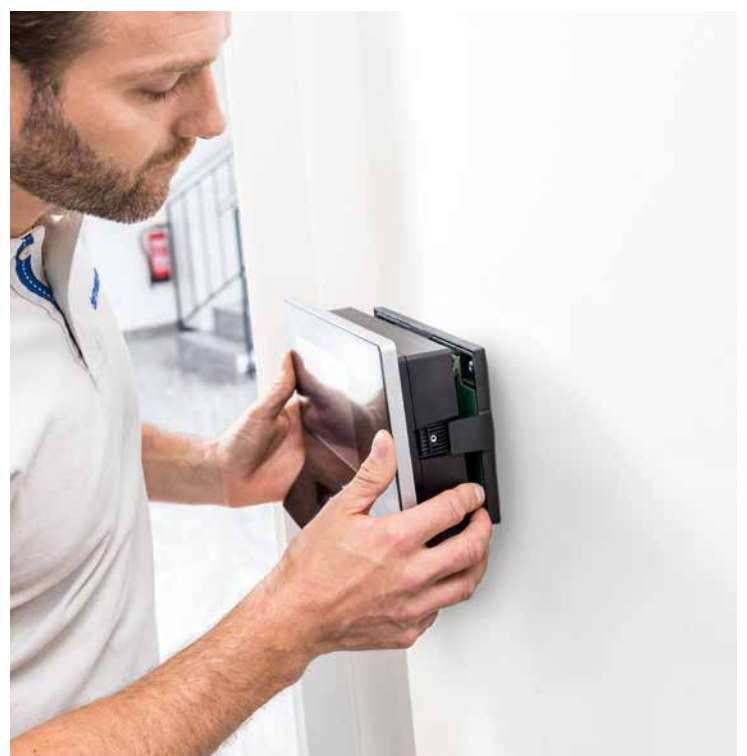

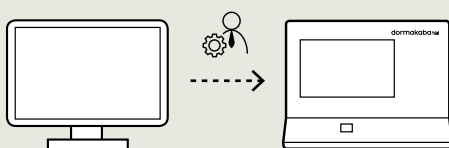

1. Fix docking station on the wall and connect the pre-installed network cable

2. Dock on terminal for automatic network registration

3. User-friendly configuration

Tailored to suit down to the last detail – Overview of all options and packages

Terminal 97 00 is available in three different versions and offers the right solution for almost every situation:

Option package 97 20 **Starter version**

Comprehensive reliable time and attendance recording and modern employee communication

Option package 97 40 **Standard version**

Additional use of access control functions (door monitoring and control, linking of offline door components via CardLink, for instance)

Option package 97 60 **Premium version**

Enhanced security and convenience thanks to encrypted data transfer, camera system, uninterruptible power supply and memory capacity for up to 10,000 people

Biometric reader

The optional biometric reader turns your finger into a personal means of identification that is always there. Simply tap with your finger for reliable identification. Tip Biometric identification can be combined with a standard RFID reader or PIN entry for even more security.
