Keyscan's Security Command Module - the multi-faceted, dedicated monitoring application designed to let security personnel carry out their tasks systematically and efficiently.

- Fully integrates with Keyscan System VII
- Displays an image of active cardholders at each site with the "show photos" feature
- Control and view floor plans on the system monitor
- Trigger dynamic floor plans to open instantly with a flashing icon pinpointing the location of the tripped alarm
- Formats security tours using door readers or inputs with timed intervals between each point in the itinerary
- Summarizes the results of all security tours for historical records and management audits
- Create "Active Maps" enunciated in real-time; door status, alarm points, input status and more
- Manually lock / unlock doors or arm / disarm alarm points
- Click on camera icons to open live video feeds
