Advanced, high-spec fittings for emergency exit doors

With this system, dormakaba is able to offer a comprehensive range of high-quality panic hardware fittings with horizontal and vertical locking for doors in emergency exits and escape routes – applications in which safety, reliability and aesthetic attractiveness are indispensable requirements. The PHA 2000 and PHB 3000 panic hardware systems fitted on the door leaf are particularly suitable for areas with increased pedestrian traffic where connecting to a classic mortice lock is not desirable or not possible. Whether office suites or apartment blocks, in buildings where there is generally no public pedestrian traffic, the Exit Pad provides the ideal answer. For both series, the same external dormakaba PHT fittings are used. With the appropriate accessories, PHA 2000 and PHT external fittings can even be used on glass doors with frames and all-glass doors.

EN 1125

Panic exit devices operated by a horizontal bar

EN 179

Emergency escape devices with exit pad

PHA 2000

PHB 3000

F Approval certification

The Panic Hardware products of the series PHA 2000 and PHB 3000 have been tested to and certified compliant with EN 1125. All products meet the requirements of Annex ZA to EN 1125 and are therefore qualified to bear the CE mark of conformity.

Exit Pad

F Approval certification

The emergency exit devices of the Exit Pad series are tested to and certified compliant with EN 179. All products meet the requirements of Annex ZA to EN 179 and are therefore qualified to bear the CE mark of conformity.

PHA 2000/PHB 3000

Practical panic hardware for many door situations

With the series PHA 2000 crossbar and the series PHB 3000 pushbar combined with the universally applicable PHT external fittings, dormakaba is able to offer a range suitable not only for narrow-stile doors but also timber and similar full-face doors.

The wide security latchbolt engages in a keeper that is normally mounted on the frame. This ensures that the latch is extremely easy to mount and that the door is also securely locked.

Benefits

For the trade

- Modular system for reduced storage costs
- Non-handed
- Universal use of PHT external fittings

For the installer

- Straightforward fixing
- Easy adjustment to different door widths and heights

For the architect/specifier

- For horizontal and vertical panic lock mechanisms
- External fitting with dormakaba lever handle or knob
- Electrical functions for special applications

For the user

- Simple operation
- Excellent quality ensures long lifespan
- Universal electric strike

¹⁾ Doors higher than 2500 mm lie outside the scope of EN 1125.

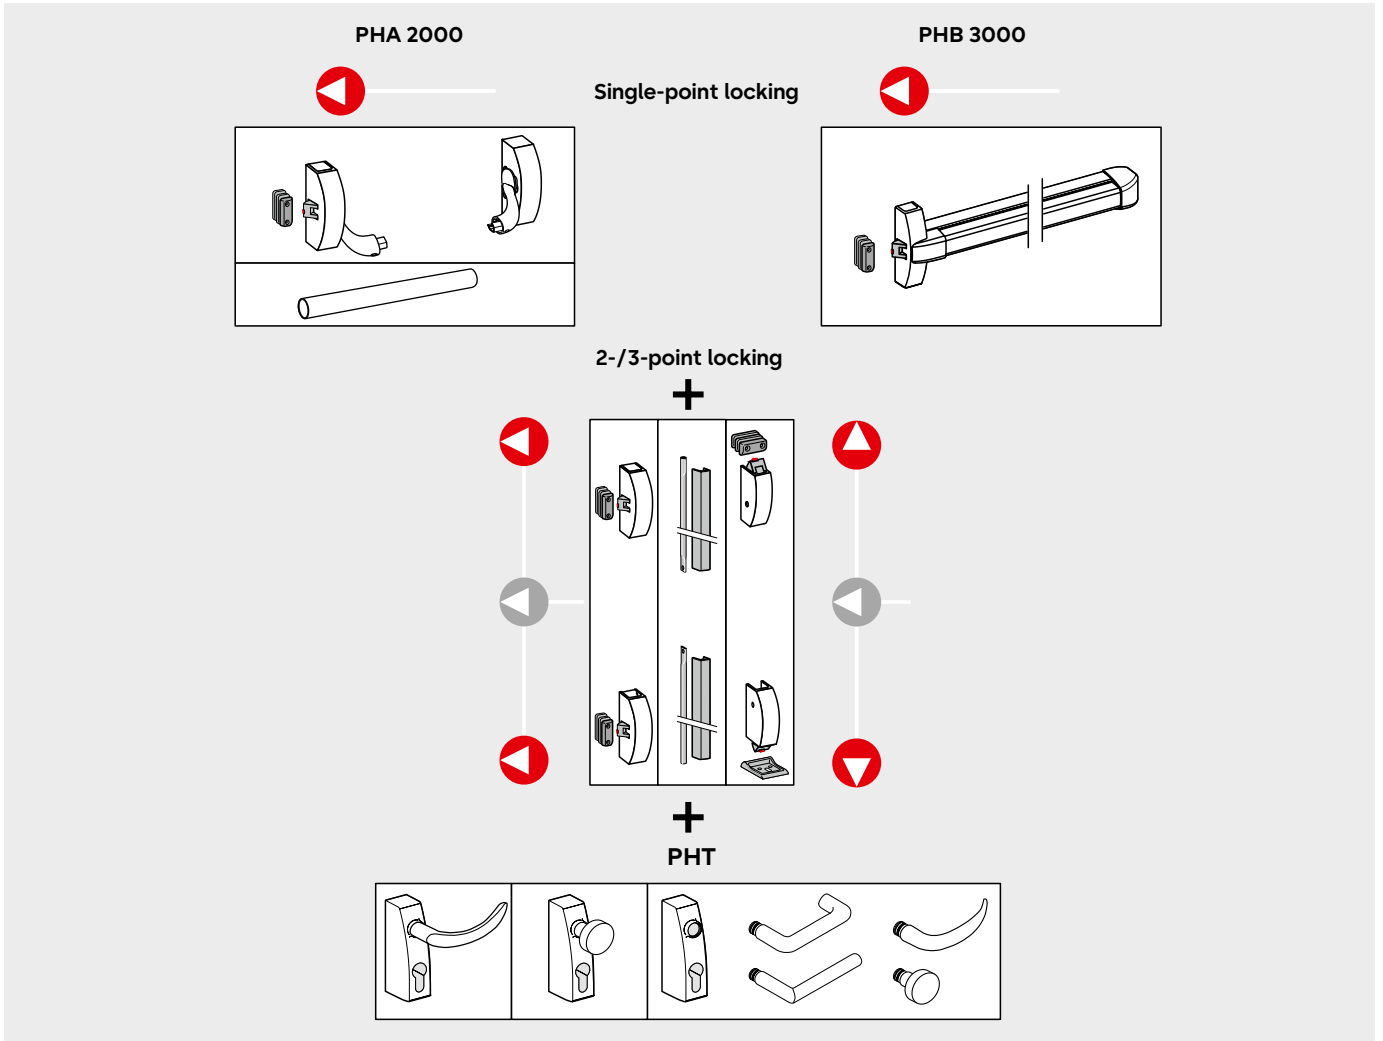

²⁾ Not for Fire and smoke check doors.

F Approval certification

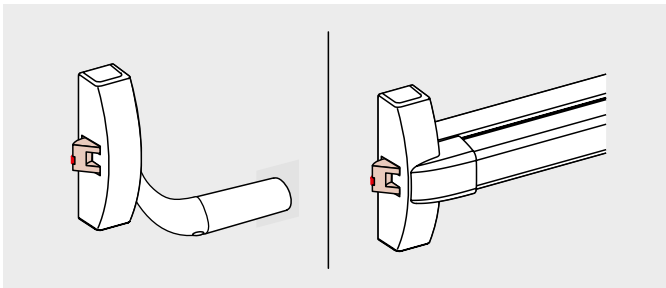

The panic hardware products marked with an **F** are approved for use with fire and smoke check doors. Approval certification for the fire and smoke check door in conjunction with the dormakaba panic hardware product is additionally required in some countries – check local regulations.

The modular panic hardware system

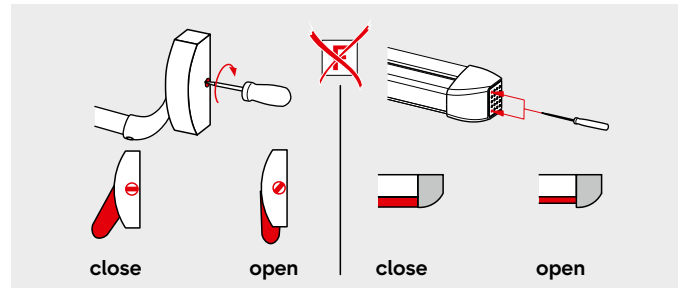

Security anti-thrust latch

The security anti-thrust latch prevents the latch from being pushed back by unauthorised means when it is in the closed position.

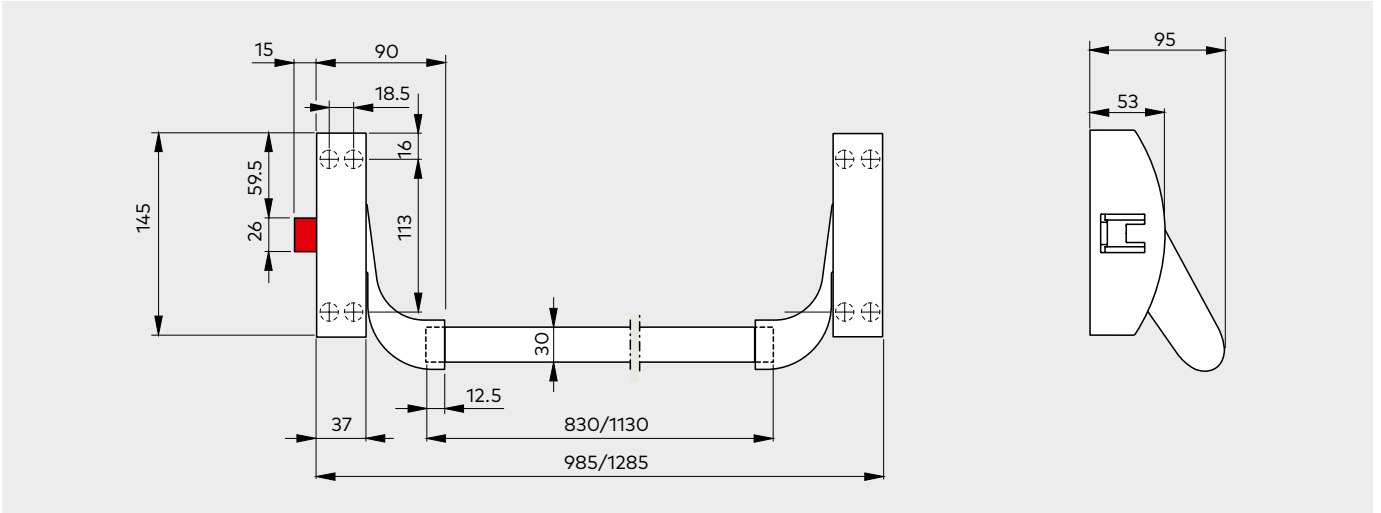

Dogging device

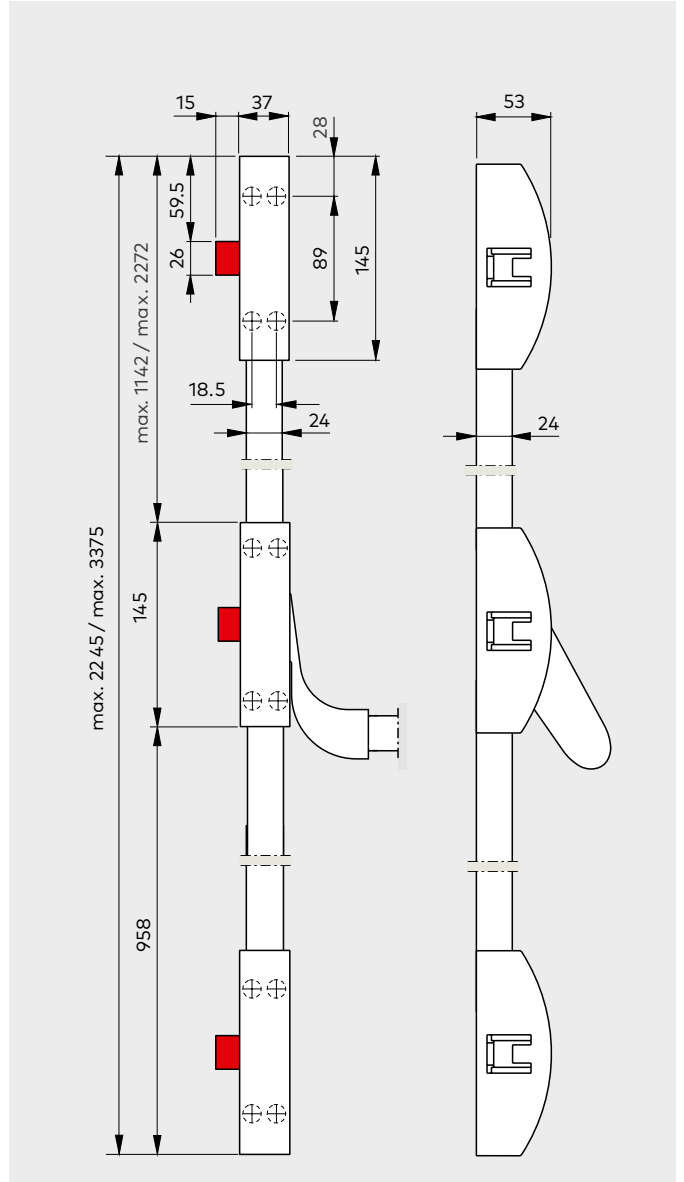

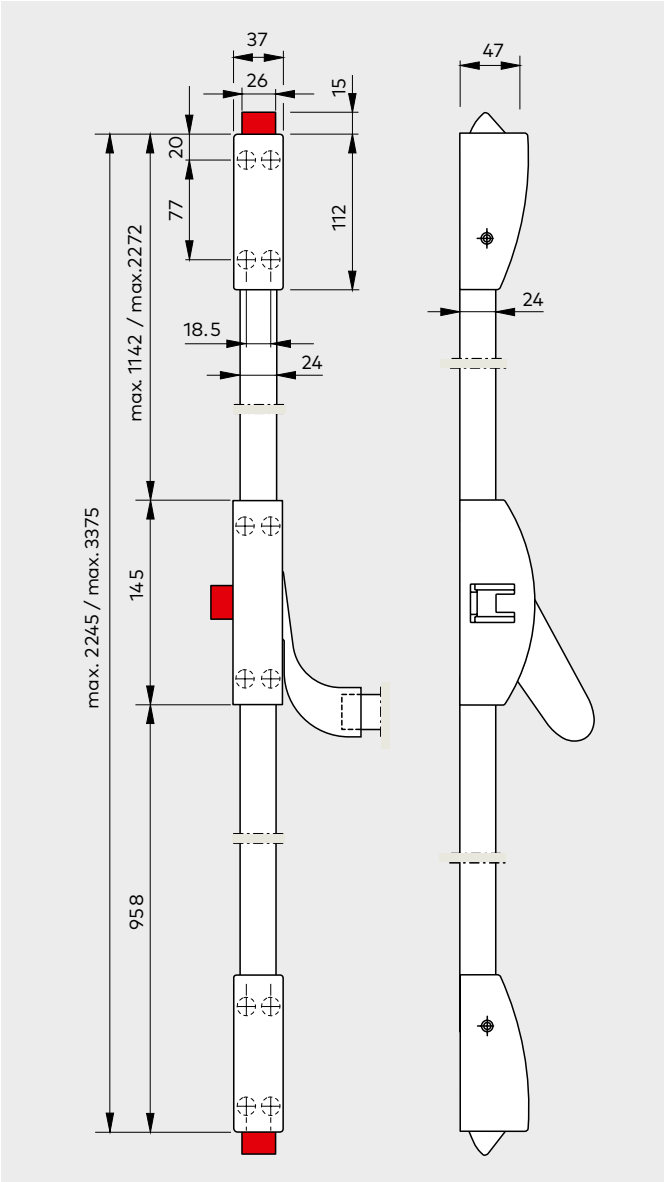

The dogging device serves to hold the latch in its retracted position so the door is freely accessible.

PHA 2000

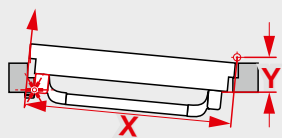

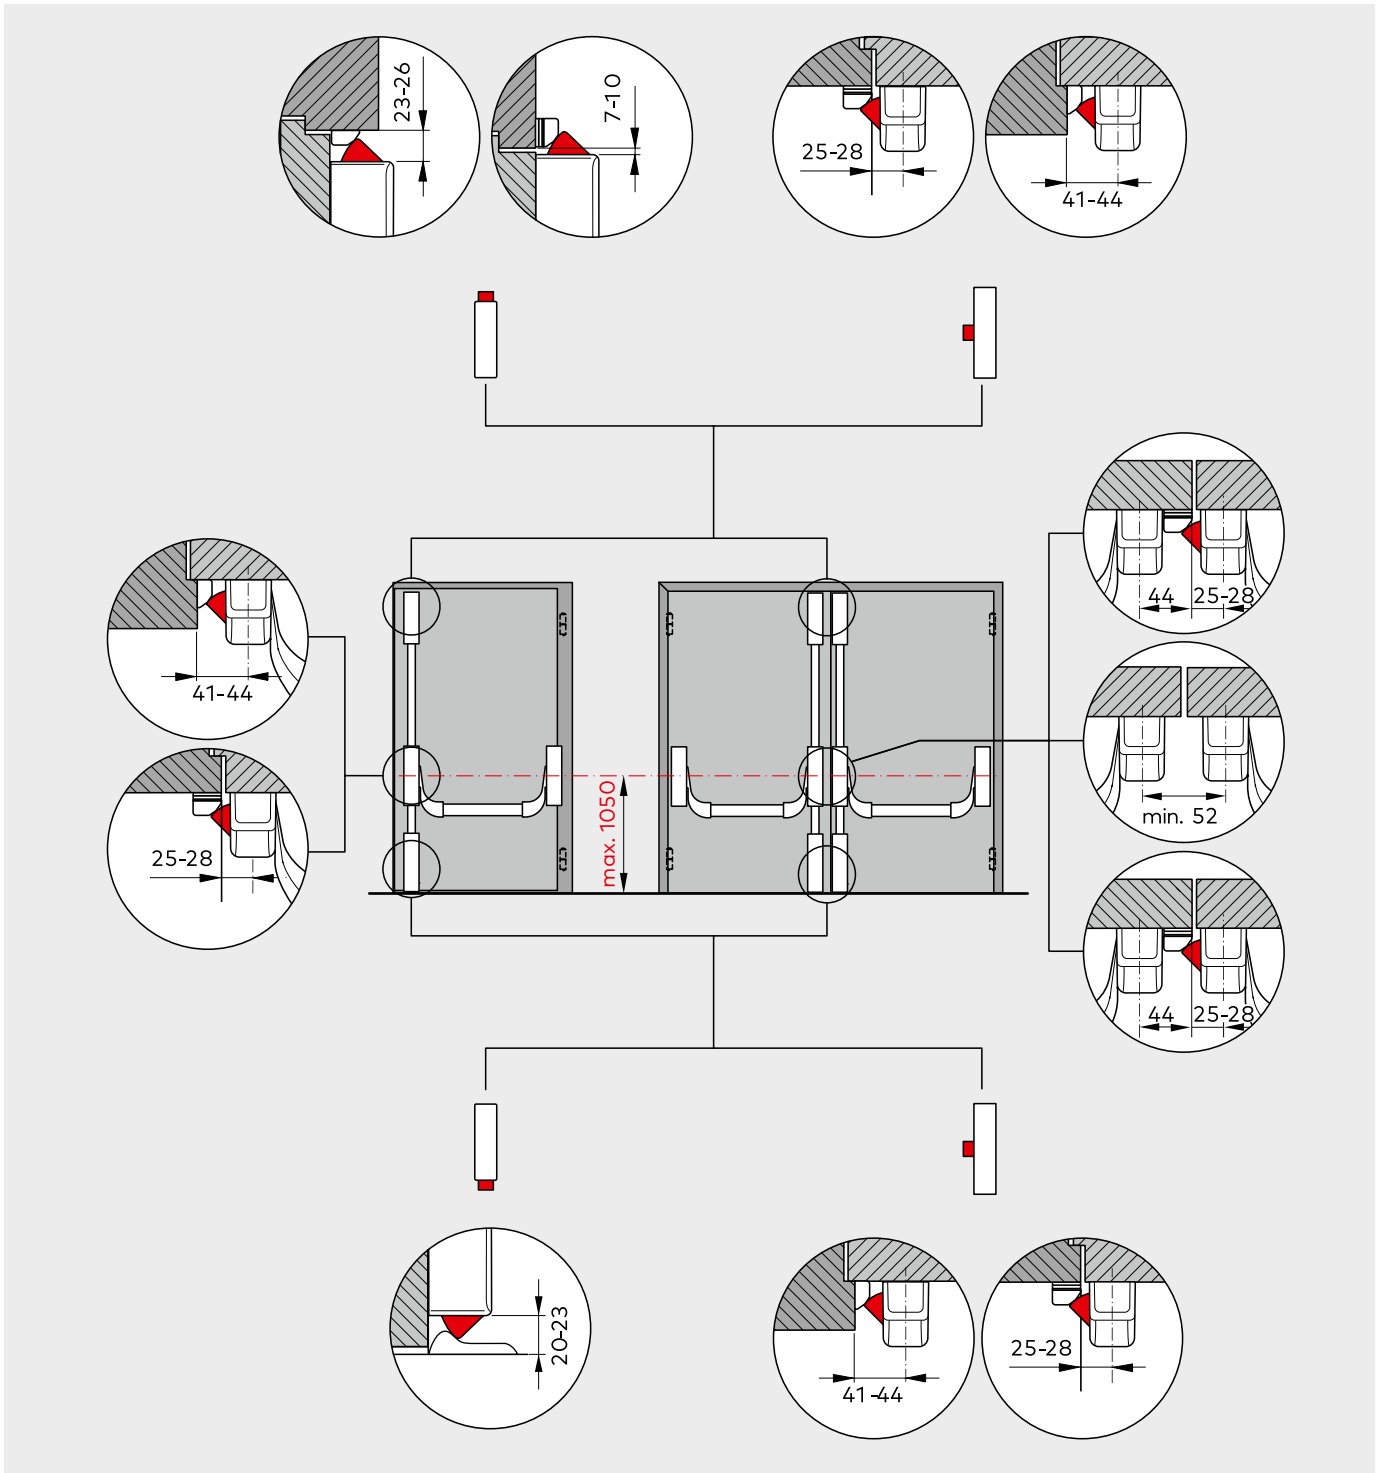

Single-point locking

2/3-point locking

Applications and fixing details

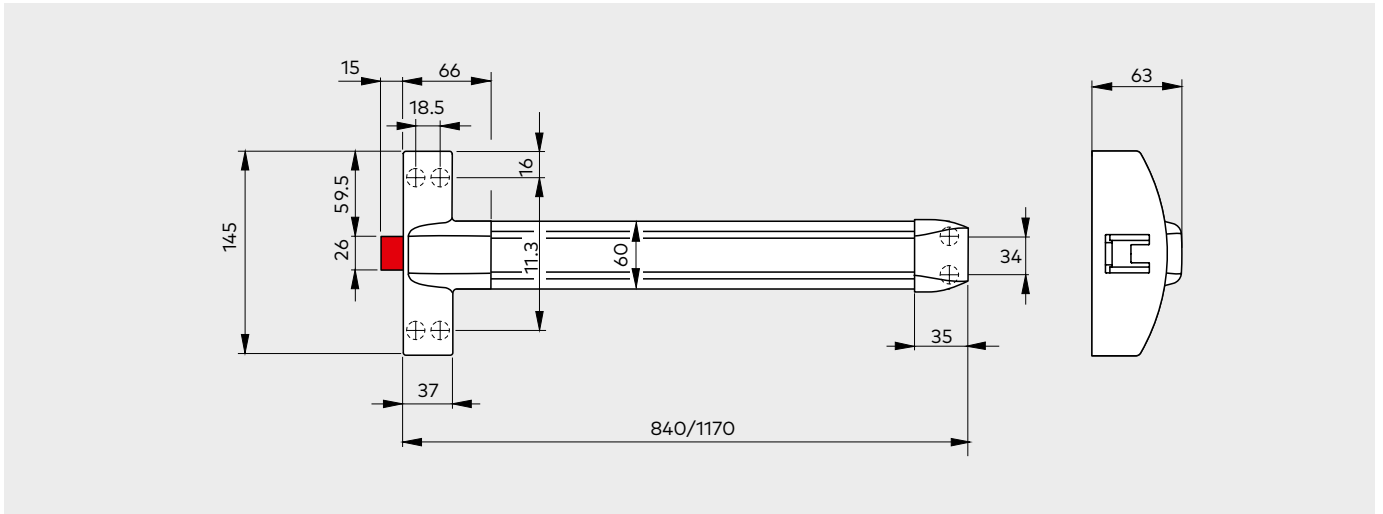

Note

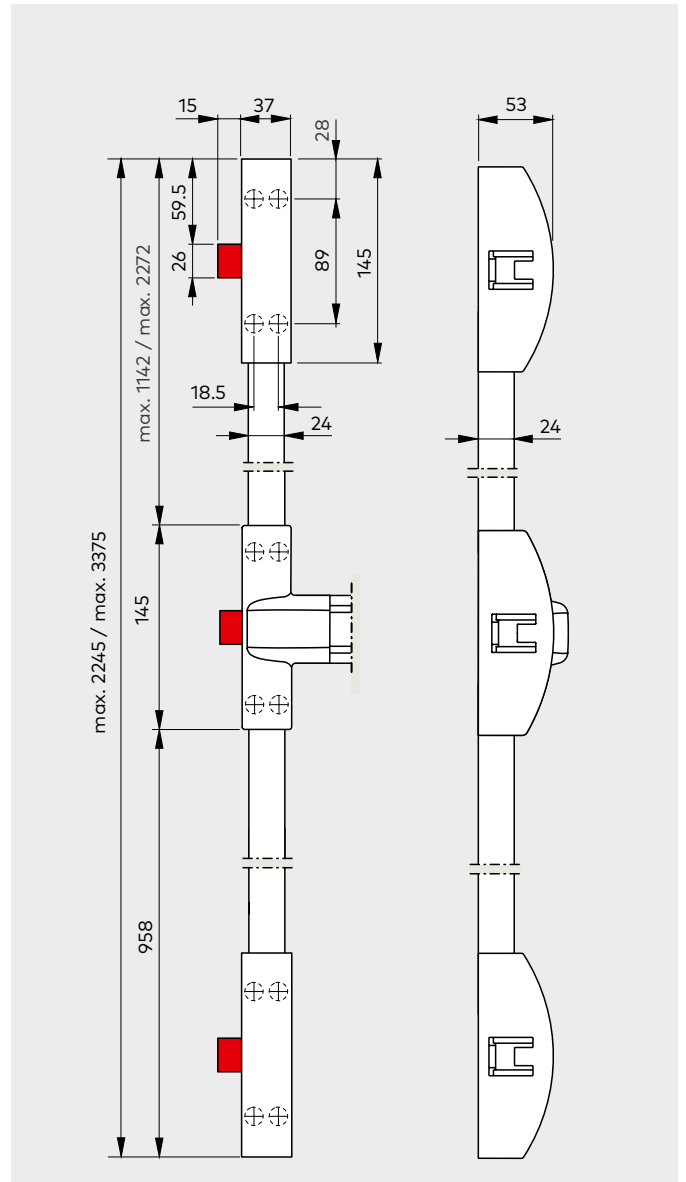

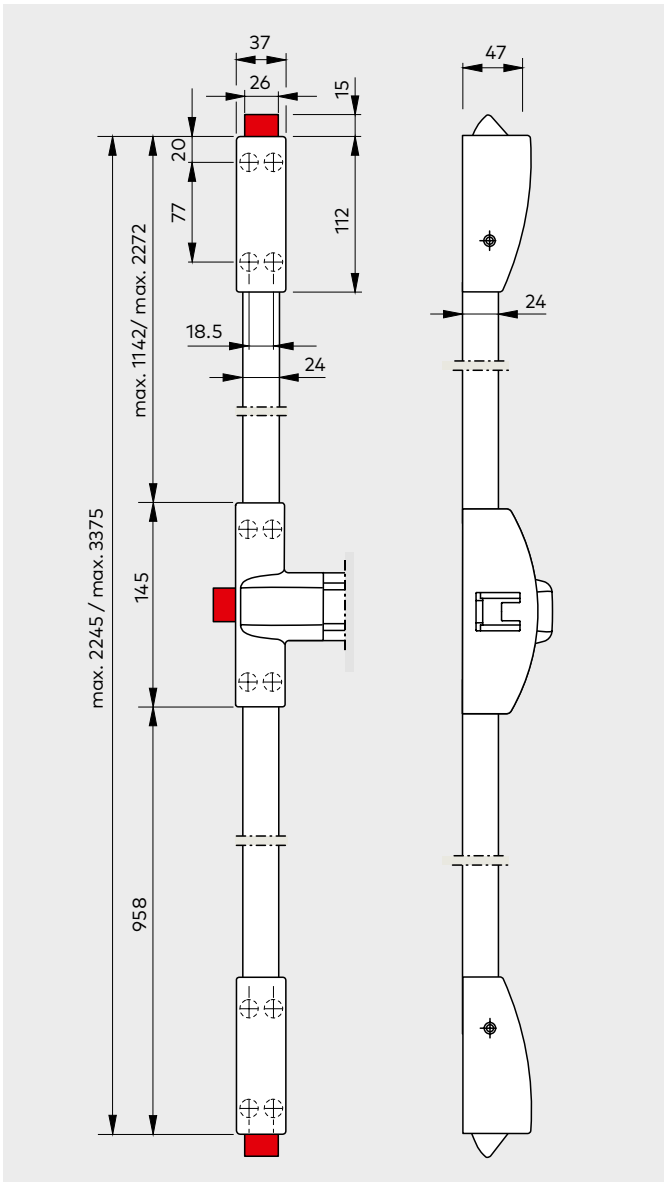

It may be the case that the exit device cannot be installed based on standard measurements where the door situation is extreme, e.g. with a door width $X < 1000$ mm combined with a hinge offset $Y > 90$ mm. dormakaba will be glad to provide you with installation suggestions on request.

Exit Pad – Emergency exits protected in accordance with EN 179

The fittings of the Exit Pad series are high-quality emergency exit devices for doors in escape routes and can be combined with the components of the PHA 2000/PHB 3000 series. They are used in buildings with no public pedestrian traffic.

It is expected that people using the building are familiar with the exits and their fittings, avoiding the likelihood of a panic situation developing. All products of the Exit Pad series have been tested to and certified compliant with EN 179. They correspond to the requirements of Annex ZA to EN 179 and can therefore carry the CE mark of conformity.

Benefits

For the trade

- All-in-one packaging for easy stocking
- Non-handed
- Universal use of PHT external fittings

For the installer

- Straightforward fixing
- Easy adjustment to different door widths and heights

For the architect/specifier

- High-quality appearance with no visible fixings
- Connecting rods with metal covers
- External fitting with dormakaba lever handle or knob

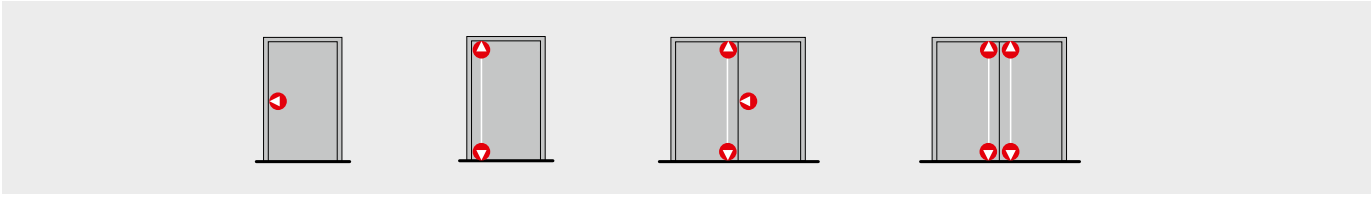

For the user

- Simple operation
- Excellent quality ensures long lifespan

Glass Kit

dormakaba's PHA 2000 and Exit Pad devices can be fitted to a wide range of toughened glass doors.

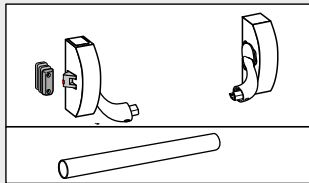

- For doors in all glass or framed assemblies.
- For single and double doors.
- Single or multi-point Locking.

- Suitable for combination with external glass door mini-fittings.
- For 8 to 10 mm toughened safety glass (single panel).

- Maximum leaf width: 1,300 mm.
- Maximum leaf height: 2,500 mm.
- Standard stainless steel design.

35000 000003

PHT – External Fitting

PHT 03, 05 **F** – External fitting with lever handle

PHT 06 – External fitting with knob

PHT 07 **F** – External fitting, modular

F
When using the PHT external fitting in conjunction with the PHA/PHB
panic hardware series or Exit Pad on fire and smoke check doors, it
must be ensured that the appropriate set of gaskets is used.

The panic hardware products of the dormakaba PHT series carry
the **CE** mark of conformity.

Our Sustainability Commitment

We are committed to foster a sustainable development along our entire value chain in line with our economic, environmental and social responsibilities toward current and future generations. Sustainability at product level is an important, future-oriented approach in the field of construction. In order to give quantified disclosures of a product's environmental impact through its entire life cycle, dormakaba provides Environmental Product Declarations (EPD), based on holistic life cycle assessments.
