

Easy adapt:

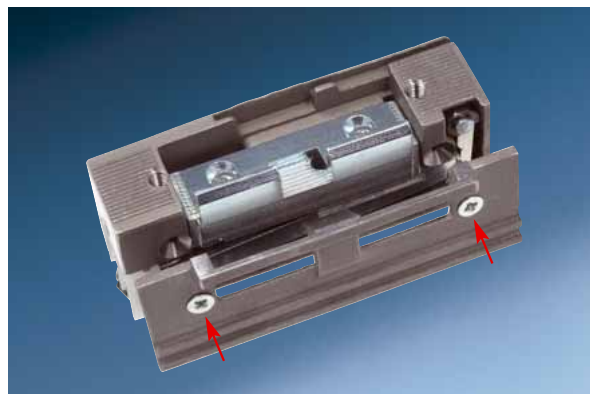

The new latch guide/keeper for DORMA electric strikes

Easy elegance:

Eliminating the latch recess in the door frame

- Visually attractive solution with integrated latch guide
- No recess required for the electric strike latch
- No interruption to the door seal
- Latch guide of solid stainless steel
- Rugged DORMA quality made in Germany
- For doors with timber, aluminium, steel and plastics frames/jambes/profiles

Easy retrofit:

For DORMA electric strikes of the Standard and Smoke and Fire protection patterns

- Latch guide suitable for all DORMA electric strikes of series 117, 137, 117 RS and 447
- Can also be combined with the functional versions "Mechanical Deactivation" and "Monitoring Contact"
- Latch guide simply and quickly fitted to electric strike using just two screws

Easy installation:

Fast, reliable and error-free – with no need for special strike plates

- No complicated matching-up of electric strike and strike plate
- Suitable for use with various standard (flat) strike plates
- Universally applicable, non-handed
- Latch guide with integral cable duct for secure location of electric strike wires

Easy adapt ist sofort lieferbar.

Easy flexibility:

Generous latch adjustment range to compensate for installation tolerances

- All the DORMA electric strikes suitable for combination feature a latch adjustment range of 4 mm to compensate for installation tolerances
- Optimum door fitting and adaptation for improved elegance and better thermal insulation
- Door latch will never jam
