

# EL 301 Protect

## Automatic Door System

For over four decades dormakaba has been manufacturing and supplying the highest quality automatic door operator throughout Australia, South East Asia, the Middle East and New Zealand.

The EL 301 Automatic Sliding Door Operator is the market choice for heavy duty door automation and includes many features such as built in UPS (battery backup) that can operate the door for up to 300 continuous cycles during a power failure.

In today's climate of increased

security requirements for retail shops, dormakaba have developed a security solution that combines heavy duty automation with an enhanced secure aluminium framed door.

The new EL 301 Protect Automatic Door System includes Solid aluminium framed doors, Multipoint electric locking, Closing edge guard, Steel reinforced door guides and Impact resistant glass

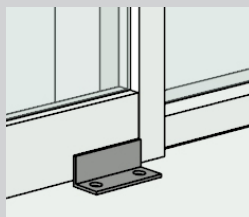

At dormakaba we pride ourselves on designing and supplying products that are unique, innovative and relevant for the Australian market.

### Advantages at a glance:

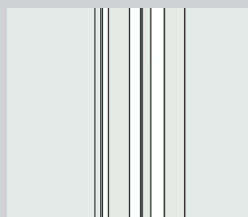

- Multipoint electric locking
- Chain drive with 1900kg tensile strength
- Secure closing edge guard
- Smart lock function (secures the door even while closing)
- Solid aluminium framed door fitted with impact resistant glass
- In built UPS providing up to 300 continuous cycles during a power failure
- Steel reinforced door guide

**Multipoint electric lock**  
Activated in lock & exit mode to ensure doors cannot be prised open

**Steel reinforced guide**  
Provides additional security to prevent doors being forced inwards

**Closing edge guard**  
Aluminium overlap when doors are fully closed to reduce possible leverage point
