

Quattro plus

Patented reversible
key system for high
security & flexibility

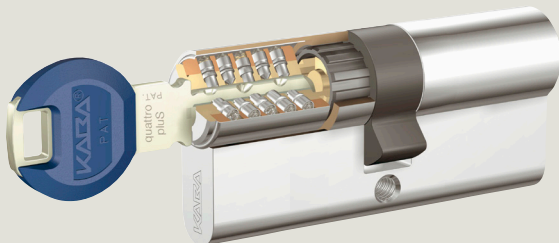

High performance cylinder

Reversible key locking system...

dormakaba manufactures and provides security solutions for the most challenging security situations and is the number one choice for clients who need to secure and control equipment in some of the most remote and demanding environments. Quattro plus is the latest evolution in the proven dormakaba range of high security locking systems. This patented reversible key locking system is designed for applications where security, durability and strict key control are paramount.

Quattro plus offers extensive flexibility with its interchangeable core system, allowing the cylinder core to be inserted into a range of locking solutions from cam locks, switch locks and padlocks to the more traditional cylinder shapes. This also gives Quattro plus the ability to master key across various applications and locations making it a powerful and efficient locking system.

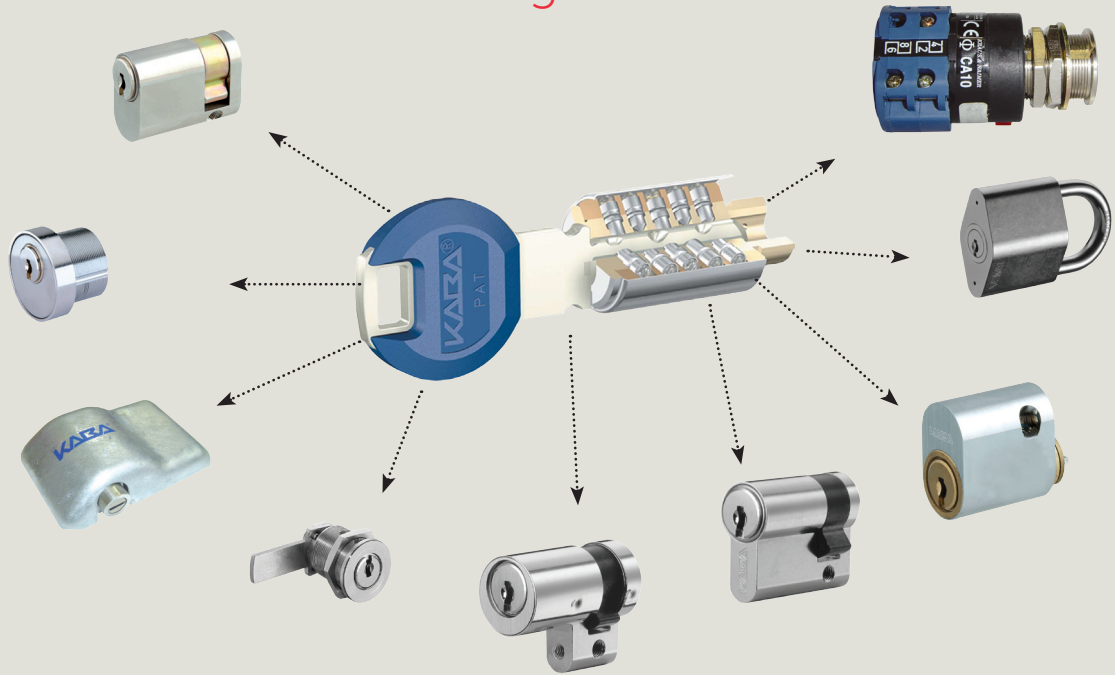

plus high security

Quattro plus guarantees optimum protection against vandalism with the system being tested to European Norm EN 1303 Grade 6 and attack resistance Grade 2*. Quattro plus will withstand manipulation, bumping and drilling.

The cylinder core comprises of up to 22 pins allowing the design of a complex and large master key system, bespoke to an individual clients exact requirements.

The robust reversible key cannot be cut on traditional key cutting machines found in high street locations. The key can only be reproduced with specialist key milling machines due to it's special milled design within the controlled dormakaba factory environment.

Interchangeable Core

plus flexibility and control

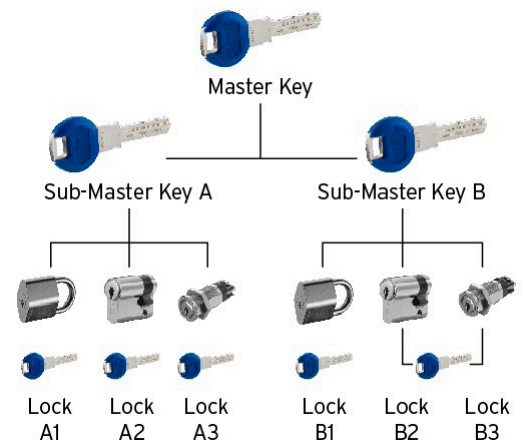

- World wide patent
- Cylinder complies with EN 1303 Key Related Security Grade 6, Attack Resistance Grade 2*.
- Additional security features and special functions also available.
- Maximum protection for the end user: replacement keys are made exclusively in the Kaba factory only against authorised signature.
- Key bow caps are available in 12 different colours.
- Smart Key with Mifare chip for integration with Access Control systems.
- Cylinder core is of modular design allowing the core to be retrofitted on site as conditions and cylinder requirements change.

plus variety of applications

- Secure Cabinets, Kiosks & Enclosures
- Server Racks
- Utility & Telecom Infrastructure
- Cash-In-Transit Vehicles
- Marine Applications
- Rail - Trackside Infrastructure & Rolling Stock.
- Control Panels
- Retail Display Cases

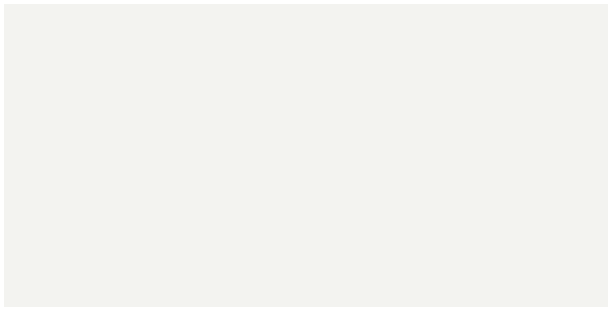

plus interchangeable core

All cylinder types are manufactured in modular design making quattro plus a cost effective and adaptable choice. Retrofitting or exchange of cylinders can be carried out on site, at any time by authorised personnel. The modular design also allows for quattro plus to be inserted into most cylinder profiles as part of a master key system.

12 different coloured key clips provide differentiation. * Only in combination with suitable security furniture.
