- Stress-free Anti-dust circulation
- Advanced Bank Card Issuance Security

Retransfer Duplex ID Card Printer

The dormakaba Retransfer Duplex Printer / USB / Ethernet ID card and credential printer is a next generation printer that uses innovative Rapid Retransfer Printing technology to provide the fastest Print metrics. This technology offers sharper-looking images than traditional card printers.

It is fully compatible with Keyscan Aurora software to produce full-color or monochrome printed single or dual sided ID cards and/or customer branded access control credentials.

Plus, it offers a wide range of optional features including Ethernet, smartcard encoding, and ultra violet (UV) printing.

The Aurora software application offers simple tools for card design, or you can upload pre-designed corporate templates directly into Aurora to allow the user to create a truly customized card within minutes.

Now small businesses can afford to produce their own ID cards and credentials.
