

Keyscan Aurora Software

Milestone VMS Integration

Robust integration solutions for Keyscan Aurora users

Now Keyscan Aurora users can access and control their Milestone Video Management System (VMS) within the new Keyscan Aurora software interface. It nicely couples access control and video management into one convenient platform.

Together, Keyscan's single-platform interface with Milestone software supports virtually all security and access control deployments. With this

new integration module, you can nicely consolidate and control all of your video feeds without the need for multiple software platforms running.

And, you can leverage the VMS within the Aurora interface to take advantage of multiple features built into Keyscan Aurora access control management software.

Features and Benefits:

- Call up and view, on demand, all cameras on your Milestone VMS.
- Select views of cameras in 1, 4, 9, and 16 panes.
- Apply some or all cameras to active maps. Click camera icon(s) to bring up the cameras' live feed within the Aurora software.
- Control cameras PTZ functions (if applicable) using Aurora's viewer for camera control.
- View live video from online transactions or call up recorded video associated with transaction events.
- Supported hardware includes XProtect Corporate 4 (later), XProtect Expert 2013 (later); XProtect Enterprise 7.5 (later); XProtect Professional 7.5 (later); XProtect Express 1 (later); Milestone Husky M30 or Milestone Husky M50 (later).
