## Integrated door closer ITS 96 EN 3-6 with thinking Backcheck

Slide channel door closer system with hydraulic Backcheck for more safety.

**Easy adjustment:** The gear transmission allows the closing force to be adjusted without having to remove the closer from the door.

Spring: the spring stores energy and releases it again to close the door.

## Better Backcheck. More Safety

Simply brakes better in wind and weather: By preventing the uncontrolled opening of exterior doors, the new integrated door closer ITS 96 EN 3-6 with backcheck effectively protects against damage and accidents.

Easy Open: the heart-shaped cam reduces the required effort to a minimum.

**Oilfit:** The filter system in the ITS 96 keeps the oil clean and ensures a long lifetime without loss of performance.

Leak Protect: The choice of materials for the piston and housing with similar thermal coefficient leads to the prevention of cracks.
