dormakaba USA quality and environmental management systems are certified to ISO 9001:2015 and ISO 14001:2015.

Versatile, durable, and reliable, featuring modern styling for institutional or high-traffic commercial applications.

dormakaba's 8900 Series, Grade 1 hydraulic surface closers are housed in corrosionresistant aluminum with a hardened pinion/piston providing toughness and highstrength. The arm hub is made from forged steel.

Standard on the 8900 Series closers are backcheck

positioning with two adjustment valves, adjustable spring sizes from 1–6. Independently certified to 10 million, the 8900 Series closers are ideal for a variety of heavy-duty, as well as barrier-free, applications.

Technical Details
Available as 8916 with fully
adjustable spring sizes 1–6.
Size 1 (5 lb opening force)
meets interior barrier-free AD
requirements.

- 8916 may be used on doors up to 48" wide interior (42" wide exterior) and up to 180 lb.
- 8956 available with adjustable spring sizes of 5-6+50% for use on exceptionally wide, tall, or heavy doors.
- Non-handed for regular, top jamb, and parallel arm applications.
- Backcheck (BC) valve (standard) provides adjustable-intensity hydraulic cushioning, preventing uncontrolled door opening to protect door and frame during abusive or abrupt opening.
- POS backcheck positioning valve (standard) maintains an effective backcheck range on parallel arm applications. Valve is accessible with the closer installed.
- Full adjustment using BC, POS, Sweep and Latch valves standard.

- Optional delayed action (DA) adjustable with separate independent valve to allow for unobstructed passage through opening.
- Full plastic cover standard.
 Full metal or full plastic
 slotted covers optional.
- All tamper-resistant (hex key) valve adjustments (including POS) accessible with closer installed.
- Standard components required for three most popular mounting configurations (Reg., TJ, PA).
- Standard fasteners include separate wood and metal screws and SN1 sex nuts for 1-3/4" thick doors.
- Full-sized templates enable accurate installation.
- A variety of specialty arm options, interchangeable across most dormakaba surface closer models.
- Full complement of optional plates and brackets available for special applications.
- Screw options include selfdrilling and tapping screws (DPK89) for steel door and frame applications or selftapping screws (TPK89) for aluminum door and frame applications.
- Stainless steel (STA Series) model available (see STA brochure for details).
- Available with holder/ release with (EMR Series) or without (EMF Series) photoelectric detector to control spread of smoke and fire (see EMR/EMF brochure for details).

Certifications

- ANSI/BHMA A156.4 Grade 1 certified.
- UL and CUL listed.
- Meets UL10C for positive pressure.
- Meets ANSI/BHMA A117.1 and ADA for barrier-free accessibility.
- CSFM approved.

Specification

The heavy-duty 8900 Series non-handed surface applied door closer with adjustable spring power and backcheck positioning adjustment. The 8900 has two independent, noncritical adjustment valves to control sweep and latch closing speeds. The backcheck positioning valve maintains an effective backcheck range on parallel arm applications. The 8916 will be available with field adjustable spring power from size 1-6 for barrier-free requirements. All closers to have field adjustable spring power from size 1-6 and meet barrier-free requirements. The 8956 will be adjustable size 5 to 6 +50% additional closing force over the size 6. All 8900 fully adjustable spring force door closers to include an integral design to positively stop adjustment of the spring at the minimum and maximum spring force settings.

Optional Specifications:

The 8900 Series closer will have delayed action (DA). Delayed action range will be effective from maximum opening to Approx.ly 65°. All 8900 closers to have full metal covers. All 8900 closers to have sex nuts with machine screws for 1-3/8" door (SN2). Closers to have self-drilling screws for steel doors and frames (DPK86). Closers to have selftapping screws for aluminum doors and frames (TPK86). Closers to have TORX security for all exposed fasteners (TX89).

Finishes
Standard Sprayed Finishes
Aluminum: 689
Bronze: 691 (Dull), 690
(Statuary), or 695 (Dark
Duranodic)
Gold: 696
Black: 693

Optional dormakaba Custom Color or Designer Color Finishes Contact Customer Service.

Optional Plated/

Architectural Finishes
Brass: 605 (Bright) or
606 (Satin)
Bronze: 611 (Bright), 612
(Satin), or 613 (Oxidized Satin
Oil Rubbed)
Nickel: 618 (Bright) or
619 (Satin)
Chrome: 625 (Bright) or
626 (Satin)
Stainless: 630 (Satin)

Warranty

For details, refer to dormakaba Limited Warranty on our website at go.dormakaba.com/terms.

REDUCED OPENING FORCE INSTALLATIONS CAUTION

Manual door closers, including those certified to meet ANSI/BHMA A156.4, when installed and adjusted to conform to ADA or other reduced opening force requirements, may not provide sufficient power to reliably close and latch a door.

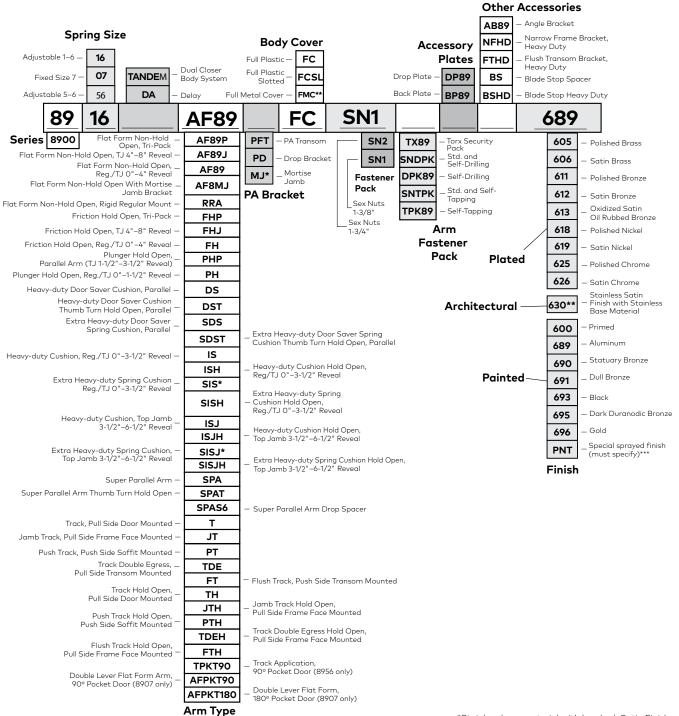

Refer to catalog for Low Energy Operators to meet reduced opening force requirements without affecting closing power.

How to Order 8900 Series

Features	8916	8956
Spring size (8916 shipped as size 4)	1–6	5–6 + 50%
Non-handed	•	•

Self-tapping screws	٥	•
Tamper-resistant TORX screws	٥	•
Full cover (plastic)	•	•
Full cover (metal)	o	0

[•] standard • optional

^{*}Stainless base material with brushed Satin Finish.

NOTES: All combinations of features and options are not available for all models.

- Non-fire rated, 90TPK (90° pocket) applications require (3 ea.) 75520 pocket pivots, ordered seperately.
- Fire rated, 90 TPK (90° pocket) applications require (3 ea.) 75523 pocket pivots, ordered seperately.
- FMC is only cover available in plated finish.

^{**}For optional dormakaba custom color or designer color finishes, contact Customer Service.

^{***}Specify handing of FMC for all JT, T, and FT applications.

Technical Drawing Symbols & Notes

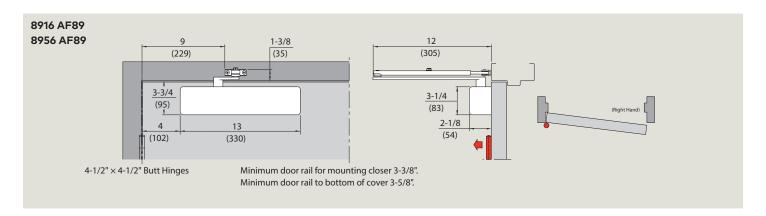

Recommended application

N/A - Not applicable/application not recommended

& − Opening force 5 lb or less on interior doors

NOTE: The effective degree at which the backcheck occurs is determined by a **backcheck positioning** adjustment. Specifically designed for parallel arm applications, it advances the backcheck to an Approx. range similar to regular and top jamb applications. The backcheck range(s) shown with each parallel arm technical drawing reflects an **on** status. Regular, top jamb, and track ranges reflect an **off** status. The 8900 Series closer is shipped with the backcheck positioning valve on.

Template Ref.	*Approx. Backcheck
90°	80°–90°

^{*} Backcheck range is with positioning valve on.

The recommended method for hanging a 90° pocket door is via the use of pocket pivots, which create optimum unobstructed space while creating a flush appearance with the door in line with the frame. Alternate methods using 3/4" Offset Pivots, Swing Clear Hinges, or Continuous Hinges are available. When using alternate methods, note where the pivot point of the hinge or pivot locates the door's angle of opening in order to determine the pocket depth.

180° POCKET DOOR (DOUBLE-LEVER ARM)

The recommended method for hanging the door is via the use of butt hinges, which create optimum unobstructed space when the door is in the pocket. Alternate methods using 3/4" Offset Pivots, Swing Clear Hinges, or Continuous Hinges are available. When using alternate methods, note where the pivot point of the hinge or pivot locates the door's angle of opening in order to determine the pocket depth.

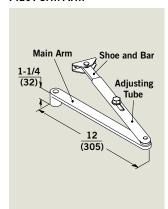

All dormakaba pocket door closers, combined with a dormakaba EM Series wall magnet, create a held open flush door until power is interrupted or the door is manually shut. See individual EM and LM Series product brochures for specific magnet and pivot information.

Flat Form Arm

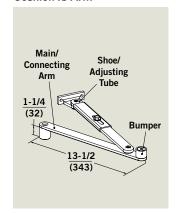

Flat Form Arm for MJ

Friction Hold Open Arm

Cushion IS Arm

Standard arm furnished with 8900 Series closers. Arm is non-handed.

AF89 — Regular flat form arm, complete (0"-4" [0 mm-102 mm] reveal).

AF89J — Top jamp flat form arm complete (4"– 8" [102 mm to 203 mm] reveal).

AF89P — Parallel flat form arm complete (Tri-Pack) (0"-4" [0 mm-102 mm] reveal). P89 included.

AFM89 — Regular flat form main arm and adjusting tube.

AF8MJ — Regular flat form arm complete for use with MJ (mortise jamb) bracket. MJ bracket ordered separately.

Provides a hold open function between Approx.ly 90° and 180° of door opening (conditions permitting). Arm is non-handed.

FH — Friction hold open arm complete (0"-4" [0 mm-102 mm] reveal).

FHJ — Top jamb friction hold open arm complete (4" – 8" [102 mm–203 mm] reveal).

FHP — Friction hold open arm complete (Tri-Pack) (0"-4" [0 mm-102mm] reveal). PHB included.

FHM04 — Friction hold open main arm and adjusting tube (0"-4" [0 mm-102 mm] reveal).

FHM48 — Friction hold open main arm and adjusting tube (3-1/4"-8" [83 mm-203 mm] reveal).

FHSB — Friction hold open shoe and bar.

Provides a cushioned opening function for regular and top jamb applications at 85°, 90°, 95°, 100°, 105°, and 110°. Arm is non-handed.

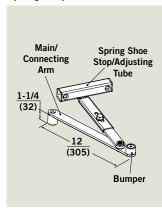

IS — Cushion IS arm complete (0"-3-1/2" [0 mm-89 mm] reveal).

ISJ — Cushion IS top jamb arm complete (3-1/2"-6-1/2" [89 mm-165 mm] reveal).

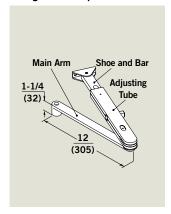

ISH — Cushion IS hold open arm complete (0"-3-1/2" [0-89 mm] reveal).

ISJH — Cushion IS top jamb hold open arm complete. (3-1/2"-6-1/2" [89 mm-165 mm] reveal).

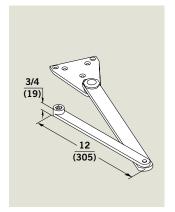

Spring Stop IS Arm

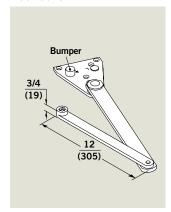

Plunger Hold Open Arm

Super Parallel Arm

Door Saver Arm

Provides a spring assisted dead stop function for regular and top jamb applications at 85°, 90°, 100°, and 110°. Arm is non-handed.

SIS — Spring stop IS arm complete (0"–3-1/2"
[0 mm–89 mm] reveal).

SISH — Spring stop IS hold open arm complete (0"–3-

1/2"
[0 mm-89 mm] reveal).

SISJ — Spring stop IS top jamb arm complete
(3-1/2"-6-1/2"
[89 mm-165 mm] reveal).

SISJH — Spring stop IS top jamb hold open arm complete (3-1/2"-6-1/2" [89 mm-165 mm] reveal).

Provides a hold open function at a selected point within a range from Approx.ly 30° to 130° (conditions and installation applications permitting). Ideal for doors frequently placed in and out of hold open. Arm is non-handed.

PH — Plunger hold open arm complete regular or top jamb mount (0"–1-1/4" [0 mm–32 mm] reveal).

PHP — Plunger hold open arm complete parallel arm or top jamb mount (1-1/4"-3-1/4" [32 mm-83 mm] reveal).

PHM — Plunger hold open main arm and adjusting tube.

PHSB — Plunger hold open shoe and bar regular and top jamb mount (0"-1-1/4" [0 mm-32 mm] reveal).

PHSBP — Plunger hold open shoe and bar parallel arm or top jamb mount (1-1/4"-3-1/4" [32 mm-83 mm] reveal). Heavy-duty parallel arm. Available in non-hold open, thumb turn hold open and hex key turn hold open. Units can be installed for maximum opening of 100° or 180°. Hold open units will hold open at 90° or 125°. Maximum opening is 180° (conditions permitting). Arm is non-handed. Non-hold open arm illustrated.

SPA — Super parallel arm non-hold open.

SPAT — Super parallel arm thumb turn hold open.

SPAK — Super parallel arm hex key turn hold open.

Heavy-duty parallel arm with integral cushioned opening function. Available in nonhold open, thumb turn hold open, and hex key turn hold open. Units can be installed to achieve either stop or stop and hold open at 85°, 90°, 100°, and 110°. Maximum opening is 110° (conditions permitting). Arm is nonhanded. Non-hold open arm illustrated.

DS — Door saver arm non-hold open only.

DST — Door saver arm thumb turn hold open.

DSK — Door saver arm hex key turn hold open.

 $\label{eq:bumper only} \mbox{\bf BUMPER DS} - \mbox{Door saver} \\ \mbox{bumper only.}$

Cushion IS/Spring Stop IS Arm Accessories

SISM — Cushion IS/spring stop IS main arm and connecting arm. (0"-3-1/2" [0 mm-89 mm] reveal).

SISJM — Cushion IS/spring stop IS top jamb main arm and connecting arm.

(3-1/2"-6-1/2" [89 mm-165 mm]

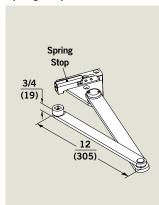

reveal).

ISSB — Cushion IS spring shoe stop and adjusting tube.

BUMPER IS — Cushion IS/spring stop IS urethane bumper.

S SPRING IS — Spring shoe stop assembly complete.

Spring Stop Door Saver Arm

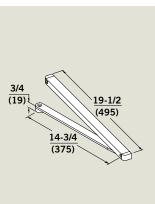

Heavy-duty parallel arm with spring assisted dead stop function. Available in non-hold open and thumb turn hold open. Units can be installed to achieve either stop or stop and hold open at 85°, 90°, 100°, and 110°. Maximum opening is 110° (conditions permitting). Arm is non-handed. Non-hold open arm illustrated.

SDS — Spring stop door saver arm.

SDST — Spring stop door saver arm thumb turn hold open.

S SPRING DS — Spring stop assembly compete.

Track Arm

Provides slide track function for improved aesthetics and vandal resistance. Units can be installed to provide 85°, 90°, 110° or 180° of door opening (conditions and application permitting). Arm is non-handed. Also available with hold open option to provide selective single point hold open. Range of hold open and maximum opening varies with mounting application. T version illustrated.

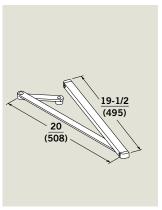

T — Track arm complete. Can be used in T, JT and FT track applications.

TH — Track hold open arm complete. Can be used in THO, JTHO and FTHO track applications.

PT89 — Push-side track arm complete. Used with PT track applications (closer on door, track or soffit).

PT89H — Push-side track hold open arm complete. Used with PT track applications (closer on door, track on soffit).

TDE Track Arm

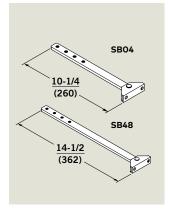

Provides slide track function for pull-side reveal conditions up to 3-1/2". Provides 125° of door opening (conditions permitting). Arm is handed. Also available with hold open option to provide selective single point hold open between 30° and 110°. Arm requires a minimum 3-3/4" clearance between door face and wall when opened 90° and greater.

TDE — Double egress track arm complete.

TDEH — Double egress hold open track arm complete.

Regular Arm Shoe and Bar

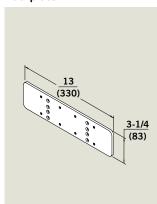

SB04 - 0"-4" (0 mm-102 mm) reveal - Shoe and bar only.

SB48 — 4"–8" (102 mm–203 mm) reveal - Shoe and bar only.

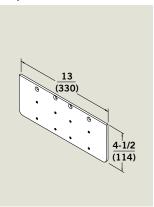

SB04 and SB48 must be used in conjunction with AMF89. Non-handed.

Backplate

BP89 — For mounting top jamb when frame face is less than 2-7/8" (73 mm). Two sets of mounting holes accommodate 1-3/4" (44 mm) or 3-1/4" (83 mm) minimum ceiling clearance.* Top set of holes create top jamb drop application to clear a surface applied stop/holder. Can also be used for regular mount closer to clear mortised stop/holder.

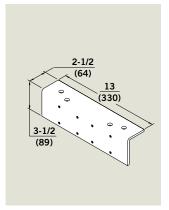

Drop Plate

DP89 — For parallel arm installation of 8900 Series closers when top door rail is less than 5-3/4" (146 mm) for non-hold open and plunger hold open. When top door rail is less than 6" (152 mm) for friction applications (assuming 5/8" (16 mm) stop dimension).

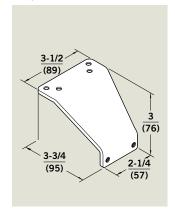

Angle Bracket

8900 Series Surface Applied Door Closer

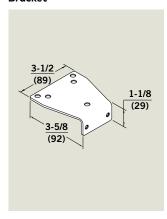

AB89 - For installation of 8900 Series closers where parallel arm and top jamb applications are not practical due to low overhead ceiling clearance, narrow frame face, or unusual trim conditions. This bracket can also be used to provide clearance for a surfaceapplied stop/holder.

Drop Bracket

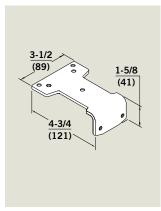

PD — For 8900 Series closer non-hold open parallel arm applications to clear a surface-applied stop/holder.

Bracket

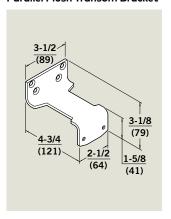

P89 — Furnished standard with 8900 P Series closer non-hold open and plunger hold open parallel arm applications. Spacer block furnished standard for use with narrow stop applications.

Parallel Hold Open Bracket

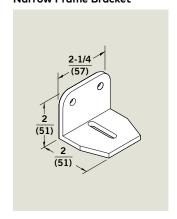

PHB — Furnished standard with 8900 FHP Series closer friction hold open parallel arm applications. Spacer block furnished standard for use with narrow stop applications.

Parallel Flush Transom Bracket

PFT — For all 8900 Series closer hold open and nonhold open parallel arm installations where flush transom conditions prohibit use of P89 or PHB bracket.

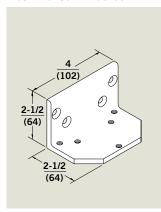

Narrow Frame Bracket

NFHD — For use with all 8900 Series DS and SPA applications where total frame depth is less than 4-1/2" (114 mm), prohibiting use of standard spacer block. NFHD bracket is used in lieu of block supplied with arm.

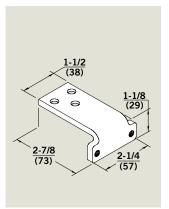

^{*}Overhead ceiling clearance is measured from bottom of frame face to ceiling.

Flush Transom Bracket

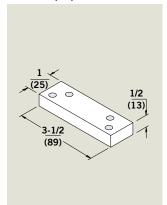

FTHD — For use with all 8900 Series DS and SPA applications where flush transom conditions prohibit normal installation of soffit bracket.

Mortised Jamb Bracket

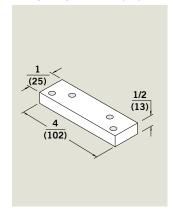

MJ — For 8900 Series closers with regular mount non-hold open assemblies where frame conditions will not permit use of the standard foot, e.g. molded, bull nose, or ornate trim. Permits use of parallel arm application between twin communicating doors where limited space prohibits use of P89 bracket. Flat form arm applications must use MJ in combination with AF8MJ Arm.

Blade Stop Spacer

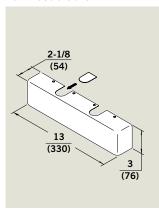

BS — For use with all 8900 Series P89, PD, and PHB applications installed on cased frames with applied blade stops. This block is used in conjunction with the spacer furnished with the arm to provide adequate clearance for the blade stop.

Heavy-Duty Blade Stop Spacer

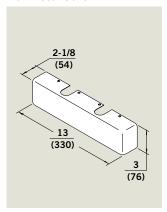

BSHD — For use with all 8900 Series DS and SPA applications installed on cased frames with applied blade stops. This block is used in conjunction with the spacer furnished with the arm to provide adequate clearance for the blade stop.

Full Plastic Cover

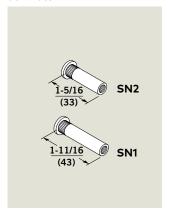

FC — Full plastic cover with interchangeable tab.
FCSL — Full plastic slotted cover with interchangeable tab. Mounting holes slotted for low ceiling conditions.

Full Metal Cover

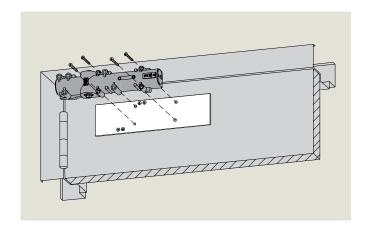

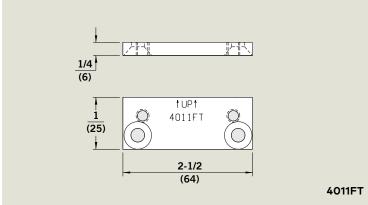

FMC— Full metal cover. Specify hand for top jamb, T track, and FT track applications.

Sex Nuts

SN1 — Sex nuts for 1-3/4" (44 mm) door.
SN2 — Sex nuts for 1-3/8" (35 mm) door.
Required for use on unreinforced doors and wood or composite labeled fire doors for securely attaching hardware to the door.

4040R — Conversion plate utilizes LCN 4040 Reg. 120° holes for attachment to the door. The frame face will require drilling and tapping two holes for the arm shoe assembly. The dormakaba 8900 Series closer will open a full 180° at this location.

4040P — Conversion plate utilizes LCN 4040 PA 180° holes for attachment to the door. The frame will require drilling and tapping four holes for the dormakaba 960R soffit bracket. The dormakaba 8900 Series closer will open a full 180° at this location.

4040C — Conversion plate utilizes **LCN 4040 Cush 90°** holes for attachment to the door. Requires drilling and tapping five holes in the frame for the dormakaba **DS** soffit bracket.

4040E — Conversion plate utilizes **LCN 4040 EDA 180°** holes for attachment to the door. Requires drilling and tapping five holes in the frame for the **SPA** soffit bracket.

4011 — Conversion plate utilizes **LCN 4011 Reg. 90°** or **LCN 4011 Reg. 140°** holes for attachment to the door. The frame face will require drilling and tapping two holes for the arm shoe assembly.

4111 — Conversion plate utilizes LCN 4111 PA 90° or LCN 4111 PA 180° holes for attachment to the door. Requires drilling and tapping five holes in the frame for the dormakaba SPA soffit bracket

4020 — Conversion plate utilizes LCN 4020 TJ 100° or LCN 4020 TJ 180° holes for attachment to the frame face. The door will require drilling and tapping two holes for the arm shoe assembly.

7500R — Conversion plate utilizes **Norton 7500 Reg. 90°** or **Norton 7500 Reg. 180°** holes for attachment to the door. The arm shoe attaches using the existing Norton arm shoe preparation.

P7500 — Conversion plate utilizes Norton P7500 PA 90° or Norton P7500 PA 180° holes for attaching the closer body to the door. The soffit bracket attaches using the existing Norton soffit bracket preparation.

8300/8500 — Conversion plate utilizes Norton 8300 and 8500 regular and parallel arm holes for attachment to the door. Regular arm shoe and parallel arm soffit bracket attachments use the existing Norton preparation.

4011FT — Optional arm shoe conversion plate used with 4040R, 4011, or 4020 for applications in which redrilling is not desirable.

89/DC220R — Conversion plate utilizes Corbin/Russwin DC2200 regular arm mounting holes for attaching the closer body to the door. Arm shoe attaches using the existing C/R mounting holes.

89SPA/DC2210PA — Conversion plate utilizes Corbin/
Russwin DC2210 heavy duty parallel arm mount holes for attaching the closer body to the door. The soffit bracket would need new holes prepared in the soffit to utilize the dormakaba SPA plate.

8980R/PA — Conversion plate utilizes dormak-aba TS83 regular or parallel arm template holes to mount the closer to the door. For parallel arm, the parallel bracket can either remain or be replaced with a new P89 standard parallel arm bracket.

dormakaba USA Inc. 6161 East 75th Street Indianapolis IN 46250
