C800 – GRADE 1 HEAVY-DUTY CYLINDRICAL LOCKSETS

Exceptional security, enhanced aesthetics, and rugged dependability.

These premium locks are built with a high performance cylindrical chassis for all applications where ANSI/BHMA A156.2 Series 4000 Grade 1 products are required. To meet the aesthetic needs of your project, these versatile locks are available in a range of trim designs.

Features

- DORMA C800 Series locks feature advanced design concepts for extreme reliability and are manufactured with the finest materials for exceptional durability.
- For exceptionally smooth operation, C800 Series lever locks incorporate a cast stainless steel retractor combined with roller bearings.

This design provides both extremely high strength and an extended service life for the lock mechanism. All steel parts are zinc dichromate plated.

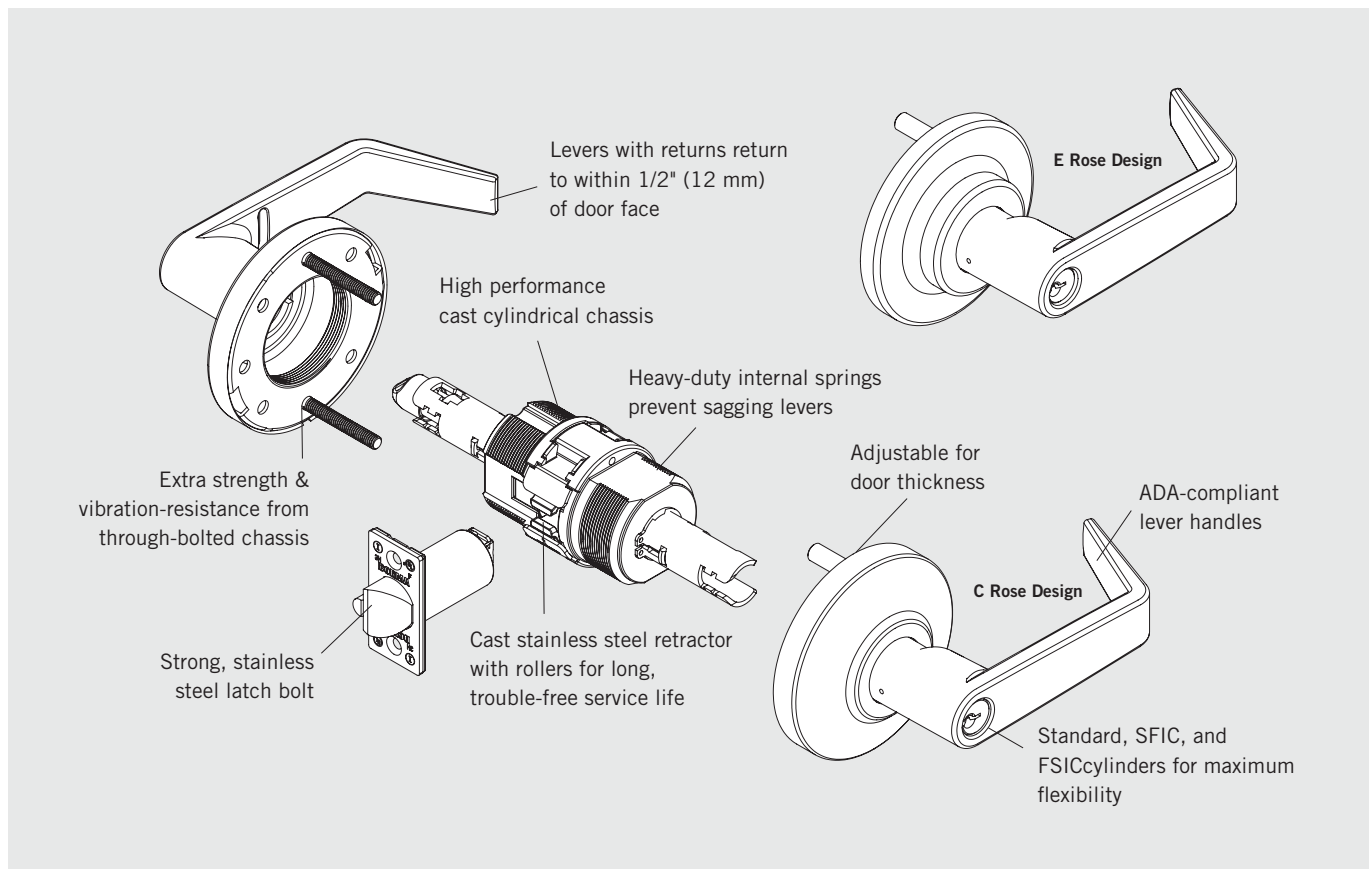

- C800 Series locks are easy to install in both wood and hollow metal doors with ANSI/BHMA Standard A156.115 preparations for cylindrical locks.
- C800 Series lever locks are through-bolted for additional strength and reliability.
- C800 Series lever locks are available with two rose designs, C or the stepped E.
- C800 Series operating lever trim features a specially designed freewheeling function to protect the lock from damage caused by excessive torque applied to the lever handles. When locked, the outside lever handle will

move freely through a 60° arc without operating the latch bolt. This free movement minimizes the opportunity for damage to the lock mechanism.

- C800 Series lever locks include a special, high-strength spring and positive stop to eliminate unsightly sagging levers.
- C800 Series lever locks are easily adjustable to accommodate doors from 1-3/4"-2-1/4" thick without spacers (1-3/8"-1-5/8" with spacers 660005). Consult the factory for other thicknesses.
- C800 Series knob locks will accommodate doors from 1-3/8"-2" thick without spacers or special tools.

Recommended Applications

- Schools and Universities
- Hotels
- Apartments
- Hospitals and Nursing Homes
- Churches
- Municipal Buildings
- Airports
- Retail Complexes
- Offices
- Warehouses

Technical Details

- Non-handed for simple installation (excluding LF or LV handed levers).
- Key-in-lever lock is through-bolted for additional strength and security.
- Cast stainless steel latch retractor with roller bearings for exceptionally smooth operation and superior strength and durability.
- Lock chassis constructed of steel, stainless steel and zinc components for superior strength and corrosion resistance.
- Stainless steel latch bolt.
- Auxiliary deadlocking latch bolt.
- Premium PVD (physical vapor deposition) finishes for consistent durable color.
- Accepts standard and interchangeable core cylinders.

- Tested to 3.5 million cycles by an independent laboratory.
- Meets A117.1 accessibility code and ADA requirements for barrier-free accessibility.
- UL listed 3 hour fire rated. Locks with 1/2" throw latch bolts are listed for A label and lesser class doors, 4'0" x 8'0" maximum per leaf.
- California State Fire Marshall approved (CSFM).

Cylinders and Keying

- Unless otherwise specified, cylinders will be provided in Schlage **C** keyway with two (2) nickel silver keys.
- Optional patented key system available.
- Refer to separate **DORMA Price List** for full details and options such as master keying, retrofit cylinders and keyways, and small format and full size interchangeable cores.

Finishes

- Brass: 605* (Bright, Clear Coated), 605 PVD (Bright), or 606 PVD (Satin)
- Bronze: 612 PVD (Satin) or 613 PVD (Dark Oxidized Satin)
- Nickel: 619 PVD (Satin)
- Chrome: 625 (Bright) or 626 (Satin)
- Stainless: 630* (Satin)
- Black: 622 (Satin)

*Available on knob locksets only.

NOTE: Consult factory for finishes not shown.

Antimicrobial Protected Coating
Specify **AM**.

Special Finish Notes

ANSI/BHMA A156.18 standards describe 613 Dark Oxidized Satin Bronze finish as a category B finish. B category finishes, "do not match from one alloy or form of material to the next and from one manufacturer to the next." The 613 finish may vary between manufacturers' products and models.

In some instances, for customer convenience, the most appropriate BHMA finish symbols are used to indicate similarity of appearance, regardless of base metal or finishing process. Finishes of latches, strikes, cylinders/cores, and visible mounting screws, though similar in appearance, may differ from the finish of the trim. Finish designations in the 600 numbers are the BHMA (Builders Hardware Manufacturers Association) industry standard.

Security Screws

Torx® tamper-resistant screws are available for all exposed screws. Specify **TX**.

Warranty

For details, refer to **DORMA Limited Warranty** on our website at go.dorma.com/terms.

Certification

- ANSI/BHMA A156.2 Grade 1 certified.

FUNCTIONS

Function	Series	Outside/Inside	Description
Dummy Trim One Side	C801		<ul style="list-style-type: none"> Used as pull or matching trim on pairs of doors. For wood or custom hollow metal doors. Trim is surface mounted.
Dummy Trim Two Sides	C802		<ul style="list-style-type: none"> Used as pull or matching trim on pairs of doors. For wood or custom hollow metal doors. Trim through-bolted.
Passage/Closet	C810		<ul style="list-style-type: none"> Latch bolt operated by trim either side at all times.
Exit	C812		<ul style="list-style-type: none"> Deadlocking latch bolt operated by inside trim. Outside trim always rigid. Inside trim always unlocked.
Exit/Communicating Passage	C825		<ul style="list-style-type: none"> Deadlocking latch bolt operated by inside trim. Blank plate outside. Minimum clearance 1" on single doors and 2" between double doors.
Patio	C830		<ul style="list-style-type: none"> Deadlocking latch bolt operated by trim either side. Outside trim locked by push button or locking device inside. Outside trim unlocked by trim inside. Outside trim unlocked by closing door. Inside trim always operates latch bolt. Do not use in rooms that have no other entrance.
Privacy, Bedroom or Bath	C840		<ul style="list-style-type: none"> Latch bolt operated by trim either side. Outside trim locked by push button or locking device inside. Outside trim unlocked by emergency release outside. Outside trim unlocked by trim inside. Outside trim unlocked by closing door. Inside trim always operates latch bolt.
Hospital Privacy	C844		<ul style="list-style-type: none"> Latch bolt operated by trim either side. Outside trim locked by push button or locking device inside. Outside trim unlocked by emergency release outside. Outside trim unlocked by trim inside. Outside trim unlocked by closing door. Inside trim always operates latch bolt.
Exit/Communicating Storeroom	C848		<ul style="list-style-type: none"> Deadlocking latch bolt operated by key in trim. Trim always inoperable. Blank plate outside. Minimum clearance 1" on single doors and 2" between double doors.
Entry/Office	C850		<ul style="list-style-type: none"> Deadlocking latch bolt operated by trim either side, except when outside trim locked by push button inside. Key outside releases push button, unlocking outside trim. Operating inside trim releases push button, unlocking outside trim. Closing door does not release push button. Inside trim always operates latch bolt.

Function	Series	Outside/Inside	Description
Entry	C853	 F109	<ul style="list-style-type: none"> ▪ Deadlocking latch bolt operated by trim either side, except when outside trim locked by push button inside. ▪ Key outside releases push button, unlocking outside trim, except when inside button pushed and turned to keep outside trim locked. ▪ Operating inside trim releases push button, unlocking outside trim, except when inside button pushed and turned to keep outside trim locked. ▪ Inside button must be turned to unlock outside trim. ▪ Inside trim always operates latch bolt
Service Station	C855	 F92	<ul style="list-style-type: none"> ▪ Deadlocking latch bolt operated by trim either side, except when outside trim locked by push button inside. ▪ Key outside, operating inside trim, or closing door releases push button, unlocking outside trim, except when slotted push button fixed in locked position by turning inside trim coin slot. ▪ Slotted inside button must be manually released.
Apartment	C860	 F88	<ul style="list-style-type: none"> ▪ Deadlocking latch bolt operated by trim either side, except when outside trim locked by key inside. ▪ When outside trim locked, latch bolt retracted by key outside. ▪ When outside trim locked, latch bolt operated by trim inside.
Exit/Communicating Classroom	C865	 F113	<ul style="list-style-type: none"> ▪ Deadlocking latch bolt operated by trim. ▪ Key locks or unlocks trim. ▪ Blank plate outside. ▪ Minimum clearance 1" on single doors and 2" between double doors.
Store Door	C866	 F91	<ul style="list-style-type: none"> ▪ Deadlocking latch bolt operated by trim either side. ▪ Key in either trim locks or unlocks both trims.
Classroom	C870	 F84	<ul style="list-style-type: none"> ▪ Deadlocking latch bolt operated by trim either side, except when outside trim locked by key outside. ▪ Outside trim locked or unlocked by key outside. ▪ Inside trim always operates latch bolt.
Communicating	C872	 F80	<ul style="list-style-type: none"> ▪ Deadlocking latch bolt operated by trim either side. ▪ Turning key in trim locks, or unlocks, its own trim independently. ▪ Do not use on doors in rooms that have no other exit.
Corridor	C873	 F90	<ul style="list-style-type: none"> ▪ Deadlocking latch bolt operated by trim either side, except when outside trim locked by key outside, or when outside trim locked by push button inside. ▪ Outside trim locked or unlocked by key outside. ▪ Operating inside trim or closing door releases push button. ▪ Inside trim always operates latch bolt.
Classroom Intruder	C877	 F110	<ul style="list-style-type: none"> ▪ Deadlocking latch bolt operated by trim either side. ▪ Key in either trim locks or unlocks outside trim. ▪ Inside trim always operates latch bolt.
Storeroom	C880	 F86	<ul style="list-style-type: none"> ▪ Deadlocking latch bolt retracted by key outside. ▪ Deadlocking latch bolt operated by trim inside ▪ Outside trim always inoperable.

Function	Series	Outside/Inside	Description
Electrically Locked Fail Safe	C880EL	 EL	<ul style="list-style-type: none"> Outside trim locked when power is on. Outside trim unlocked when power is interrupted. Deadlocking latch bolt retracted by key outside. Inside trim always operates latch bolt.
Electrically Unlocked Fail Secure	C880EU	 EU	<ul style="list-style-type: none"> Outside trim unlocked when power is on. Outside trim locked when power is interrupted. Deadlocking latch bolt retracted by key outside. Inside trim always operates latch bolt.
Asylum	C882	 F87	<ul style="list-style-type: none"> Deadlocking latch bolt retracted by key either side. Both trims always rigid.
Faculty Restroom/ Hotel	C885	 F93	<ul style="list-style-type: none"> Deadlocking latch bolt operated by trim inside at all times. Outside trim always inoperable. Latch bolt retracted by key outside and lever inside, except when push button inside activates visual occupancy indicator in cylinder face, allowing only emergency master key to operate. Operating inside lever or closing door releases visual occupancy indicator. Rotating inside spanner button provides lock out feature by keeping visual occupancy indicator thrown. Released by lock out tool only (tool provided). Faculty Restroom/Hotel function available in SC and SE Keyway only. Not available in SFIC or prepared for competitor cylinders.

Indicates rigid or inoperable lever.

Indicates also available in knob trim.

ELECTROMECHANICAL OPTIONS

Electromechanical Functions

- Electrically locked (fail safe).
- Electrically unlocked (fail secure).

Electrical Requirements for Solenoid Functions

Voltage: 24 VDC regulated, filtered.
Current: 0.145 A.
UL and CUL listed for use on fire doors.

- Solenoids are rated for continuous duty.
- Repeated operation at voltage exceeding +/-10% is not recommended.
- Recommended power supply: DORMA PS610RF

Monitoring Options

RX — Request-to-exit signaling switch.

Voltage: 250 VAC.

Current Rating: 1 A.

Wire Leads: 22 AWG.

- A microswitch attached to chassis is activated by inside lever. The switch signals the lever use to security, allowing a means of immediate egress
- Available on the following functions: C810, C850, C853, C870, C880, C880EL, C880EU.

When ordering specify **RX**.

Example: C880EURX.

CAUTION: Not recommended for use on doors used for Life Safety egress.

LOCK OPTIONS

Trim Options

Roses

C Rose — Default Rose for all C800 lever style locks.

E Rose — Optional stepped rose for all C800 lever style locks.

D Rose — C-style rose with **LOCK** stamped on the inside trim for double cylinder functions. Available on C860 and C877. Specify **D Rose**.

F Rose — E-style stepped rose with **LOCK** stamped on the inside trim for double cylinder functions. Available on C860 and C877. Specify **F Rose**. Call customer service for availability.

Tactile Warning (Knurling)

Grooved or knurled levers available on LR and LG designs only. All other lever and knob designs available with abrasive coating only.

Strike Options

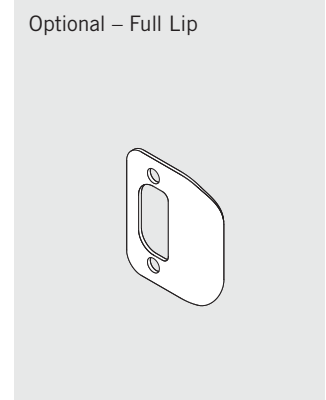

Dust box included.
5001 — ANSI 1-1/4" x 4-7/8" strike. 1-3/16" lip length. Default strike for all C800 Series locks.

Dust box included.
5101 — 1-1/8" x 2-3/4" square T-strike. 1-1/8" lip length. Optional for all C800 Series locks.
5102 — 1-1/8" x 2-3/4" T-strike with radiused corners. 1-1/8" lip length. Optional for all C800 Series locks.

For optional 1-1/2" lip length, specify 5101-112 or 5102-112.

5201 — 1-5/8" x 2-1/4" full curved lip strike with square corners. 1-1/8" lip length. Optional for all C800 Series locks.
5202 — 1-5/8" x 2-1/4" full curved lip strike with 1/4" radiused corners. 1-1/8" lip length. Optional for all C800 Series locks.
