Combi B 30

Proven reliability, maximum flexibility and high end design

With significant extensions in functionality and ease of use, the new model „Combi B 30" leaves almost no wishes unfulfilled. The timeless, flat metal input is a perfect fit for each safe.

Our customers esteem the mechanical redundancy and it's guaranteed all time reliability with the well known double bit key system. The batteries are integrated into the flat input unit. In addition of that an optional power supply can be used to power it permanently.

A PC-software allows the reading of the lock memory as well as a comfortable programming.

Flexibility

• Can be integrated into access
  control systems

The keypad and the knob of the input unit are designed to allow flexible mounting in all positions.
An optional bolt work handle is available fitting seamless in the modern design.
A suitable escutcheon in the same design can be added. Due to this modular system, a maximum flexibility is achieved for installation.
The Combi B 30 can be complemented or retrofitted with the optional VdS certified alarm box for the integration into alarm systems.
A connection to existing access-control elements such as card or fingerprint readers can be realized with a stand alone Combi B 30 lock unit, the dial knob unit and an optional status LED
(Attention: not certified).

Design
• High-end
• Elegant
• Modern

The timeless design of the previous input unit has been modernized carefully and thus represents a new interpretation in the most elegant manner.

The modern design concept emphasizes the value and reliability of your secure storage unit. In addition to the standard input unit a bolt work handle is available

Both the input unit and the bolt mechanism handle are available in the following surfaces:
• Matt Chrome (standard)
• Shiny chrome
• Gilded
• Powder-coated black
• Powder-coated white
• Powder coated grey
• Other colours on request.
